The Constitution of Canada (French: Constitution du Canada) is the supreme law in Canada. It outlines Canada's system of government and the civil and human rights of those who are citizens of Canada and non-citizens in Canada. Its contents are an amalgamation of various codified acts, treaties between the Crown and Indigenous Peoples (both historical and modern), uncoded traditions and conventions. Canada is one of the oldest constitutional monarchies in the world.

The Canadian constitution includes core written documents and provisions that are constitutionally entrenched, take precedence over all other laws and place substantive limits on government action; these include the Constitution Act, 1867 (formerly the British North America Act, 1867) and the Canadian Charter of Rights and Freedoms. The Constitution Act, 1867 provides for a constitution "similar in principle" to the largely unwritten constitution of the United Kingdom, recognizes Canada as a constitutional monarchy and federal state, and outlines the legal foundations of Canadian federalism.

The Constitution of Canada includes written and unwritten components. Section 52 of the Constitution Act, 1982 states that "the Constitution of Canada is the supreme law of Canada" and that any inconsistent law is of no force or effect. It further lists written documents which are included in the Constitution of Canada; these are the Canada Act 1982 (which includes the Constitution Act, 1982), the acts and orders referred to in its schedule (including in particular the Constitution Act, 1867), and any amendments to these documents.

The Supreme Court of Canada has held that this list is not exhaustive and that the Constitution of Canada includes a number of pre-confederation acts and unwritten components as well. The Canadian constitution also includes the fundamental principles of federalism, democracy, constitutionalism and the rule of law, and respect for minorities. See list of Canadian constitutional documents for details.

The first semblance of a constitution for Canada was the Royal Proclamation of 1763. The act renamed the northeasterly portion of the former French province of New France as Province of Quebec, roughly coextensive with the southern third of contemporary Quebec. The proclamation, which established an appointed colonial government, was the constitution of Quebec until 1774 when the British parliament passed the Quebec Act, which expanded the province's boundaries to the Ohio and Mississippi Rivers (one of the grievances listed in the United States Declaration of Independence). Significantly, the Quebec Act also replaced French criminal law with the English common law system; but the French civil law system was retained for non-criminal matters.

The Treaty of Paris of 1783 ended the American War of Independence and sent a wave of British loyalist refugees northward to Quebec and Nova Scotia. In 1784, the two provinces were divided: Nova Scotia was split into Nova Scotia, Cape Breton Island (rejoined to Nova Scotia in 1820), Prince Edward Island, and New Brunswick, while Quebec was split into Lower Canada (southern Quebec) and Upper Canada (southern through lower northern Ontario). The winter of 1837–38 saw rebellion in both Canadas, contributing to their re-union as the Province of Canada in 1841.

The British North America Act, 1867 established the Dominion of Canada as a federation of provinces. Initially, on 1 July 1867, four provinces entered into confederation as "One dominion under the name of Canada": Canada West (former Upper Canada, now Ontario), Canada East (former Lower Canada, now Quebec), Nova Scotia, and New Brunswick. Title to the Northwest Territories was transferred by

the Hudson's Bay Company in 1870, out of which the province of Manitoba (the first to be established by the Parliament of Canada) was created. British Columbia joined Confederation in 1871, followed by Prince Edward Island in 1873. The Yukon Territory was created by Parliament in 1898, followed by Alberta and Saskatchewan in 1905 (all out of parts of the Northwest Territories). Newfoundland, Britain's oldest colony in the Americas and by then also a Dominion, joined Confederation in 1949. Nunavut was created in 1999 from the Northwest Territories.

An Imperial Conference in 1926 that included the leaders of all Dominions and representatives from India (which then included Burma, Bangladesh, and Pakistan), led to the eventual enactment of the Statute of Westminster 1931. The statute, an essential transitory step from the British Empire to the Commonwealth of Nations, provided that existing Dominions became fully sovereign of the United Kingdom and any new Dominions would be fully sovereign upon the grant of Dominion status. Although listed, Newfoundland never ratified the statute so was still subject to imperial authority when its entire system of government and economy collapsed in the mid-1930s. Canada did ratify the statute but with a requested exception—the Canadian federal and provincial governments could not agree on an amending formula for the Canadian constitution. It would be another 50 years before this was achieved. In the interim, the British parliament periodically passed constitutional amendments when requested by the government of Canada. This was never anything but a rubber stamp.

The patriation of the Canadian constitution was achieved in 1982 when the British parliament, with the request and assent of the Canadian parliament, passed the Canada Act 1982, which included in its schedules the Constitution Act, 1982. The United Kingdom thus renounced any remaining responsibility for, or jurisdiction over, Canada. In a formal ceremony on Parliament Hill in Ottawa, Queen Elizabeth II proclaimed the Constitution Act, 1982 into law on 17 April 1982.

The Constitution Act, 1982, includes the Canadian Charter of Rights and Freedoms. Before the Charter, various statutes protected an assortment of civil rights and obligations but nothing was enshrined in the constitution until 1982. The Charter has thus placed a strong focus upon individual and collective rights of the people of Canada. The enactment of the Charter of Rights and Freedoms has fundamentally changed much of Canadian constitutional law. The act also codified many previously oral

constitutional conventions and made amendment of the constitution in general significantly more difficult. Previously, the Canadian constitution could be formally amended by an act of the British parliament, or by informal agreement between the federal and provincial governments, or even simply by adoption as the custom of an oral convention or performance that shows precedential but unwritten tradition. Since the act, textual amendments must now conform to certain specified provisions in the written portion of the Canadian constitution.

This was an Act of the British parliament, originally called the British North America Act, 1867. It outlined Canada's system of government, which combines Britain's Westminster model of parliamentary government with the division of sovereignty (federalism). Although it is the first of 20 British North America Acts, it is the most famous as the primary document of Canadian Confederation. With the patriation of the Constitution in 1982, this Act was renamed Constitution Act, 1867. In recent years, the 1867 document has mainly served as the basis on which the division of powers between the provinces and the federal government is analyzed.

Endorsed by all provincial governments except that of Quebec, this was the formal Act of Parliament that effected Canada's full legislative independence from the United Kingdom. Part V of this act established an amending formula for the Canadian constitution, the lack of which (due to more than 50 years of disagreement between the federal and provincial governments) meant Canada's constitutional amendments still required enactment by the British parliament after Statute of Westminster in 1931.

The Constitution Act, 1982 was enacted as a schedule to the Canada Act 1982, a British Act of Parliament which was introduced at the request of a joint address to Queen Elizabeth II by the Senate and House of Commons of Canada. The version of the Canada Act 1982 which is in force in Britain is in English only, but the version of the act in force in Canada is bilingual, English and French. In addition to enacting the Constitution Act, 1982, the Canada Act 1982 provides that no further British acts of Parliament will apply to Canada as part of its law, finalizing Canada's legislative independence.

### Canadian Charter of Rights and Freedoms

As noted above, this is Part I of the Constitution Act, 1982. The Charter is the constitutional guarantee of the civil rights and liberties of every citizen

in Canada, such as freedom of expression, of religion, and of mobility. Part II addresses the rights of Aboriginal peoples in Canada.

It is written in plain language to ensure accessibility to the average citizen. It applies only to government and government actions to prevent the government from creating unconstitutional laws.

### Amending formula

Instead of the usual parliamentary procedure, which includes the monarch's formal royal assent for enacting legislation, amendments to any of the acts that collectively form the constitution must be done in accordance with Part V of the Constitution Act, 1982, which provides for five different amending formulae. Amendments can be brought forward under section 46(1) by any province or the federal legislature. The general formula set out in section 38(1), known as the "7/50 formula", requires: (a) assent from both the House of Commons and the Senate; (b) the approval of two-thirds of the provincial legislatures (at least seven provinces) representing at least 50 per cent of the population of the provinces (effectively, this would include at least Quebec or Ontario, as they are the most populous provinces). This formula specifically applies to amendments related to the proportionate representation in Parliament, powers, selection, and composition of the Senate, the Supreme Court and the addition of provinces or territories.

The other amendment formulae are for particular cases as provided by the act. An amendment related to the Office of the King, the use of either official language (subject to section 43), the amending formula itself, or the composition of the Supreme Court, must be adopted by unanimous consent of all the provinces in accordance with section 41. In the case of an amendment related to provincial boundaries or the use of an official language within a province alone, the amendment must be passed by the legislatures affected by the amendment (section 43). In the case of an amendment that affects the federal government only, the amendment does not need the approval of the provinces (section 44). The same applies to amendments affecting the provincial government alone (section 45).

Canada's constitution has roots going back to the thirteenth century, including England's Magna Carta and the first English Parliament of 1275. Canada's constitution is composed of several individual statutes. There are three general methods by which a statute becomes entrenched in the Constitution:

Specific mention as a constitutional document in section 52(2) of the Constitution Act, 1982 (e.g., the Constitution Act, 1867). Constitutional entrenchment of an otherwise statutory English, British, or Canadian document because its (still in force) subject matter provisions are explicitly assigned to one of the methods of the amending formula (per the Constitution Act, 1982)—e.g., provisions with regard to the monarchy in the English Bill of Rights 1689 or the Act of Settlement 1701. English and British statutes are part of Canadian law because of the Colonial Laws Validity Act 1865; section 129 of the Constitution Act, 1867; and the Statute of Westminster 1931. If still at least partially unrepealed those laws then became entrenched when the amending formula was made part of the constitution. Reference by an entrenched document—e.g., the Preamble of the Constitution Act, 1867's entrenchment of written and unwritten principles from the constitution of the United Kingdom or the Constitution Act, 1982's reference to the Proclamation of 1763. Crucially, this includes Aboriginal rights and Crown treaties with particular First Nations (e.g., historic "numbered" treaties; modern land-claims agreements).

#### Unwritten or uncodified sources

The existence of unwritten constitutional components was reaffirmed in 1998 by the Supreme Court in *Reference re Secession of Quebec*.

The Constitution is more than a written text. It embraces the entire global system of rules and principles which govern the exercise of constitutional authority. A superficial reading of selected provisions of the written constitutional enactment, without more, may be misleading.

In practice, there have been three sources of unwritten constitutional law:

#### Conventions

Constitutional conventions form part of the constitution, but they are not judicially enforceable.

They include the existence of the office of prime minister and the Cabinet, the practise that the Crown in most circumstances is required to grant royal assent to bills adopted by both houses of Parliament, and the requirement that the prime minister either resign or request a dissolution and general election upon losing a vote of confidence in the House of Commons.

### Royal prerogative

Reserve powers of the Canadian Crown, being remnants of the powers once held by the British Crown, reduced over time by the parliamentary system. Primarily, these are the orders in Council, which give the government the authority to declare war, conclude treaties, issue passports, make appointments, make regulations, incorporate, and receive lands that escheat to the Crown.

### Unwritten principles

Principles that are incorporated into the Canadian constitution by the preamble of the Constitution Act, 1867, including a statement that the constitution is "similar in Principle to that of the United Kingdom", much of which is unwritten. Unlike conventions, they are justiciable. Amongst those principles most recognized as constitutional to date are federalism, liberal democracy, constitutionalism, the rule of law, and respect for minorities. Others include responsible government, representation by population, judicial independence, parliamentary supremacy, and an implied bill of rights. In one case, the Provincial Judges Reference (1997), a law was held invalid for contradicting an unwritten principle (in this case judicial independence).

Unlike in most federations, Canadian provinces do not have written provincial constitutions. Provincial constitutions are instead a combination of uncodified constitution, provisions of the Constitution of Canada, and provincial statutes.

Overall structures of provincial governments (like the legislature and cabinet) are described in parts of the Constitution of Canada. Governmental structure of the original four provinces are described in Part V of the Constitution Act, 1867. The three colonies that joined Canada

after Confederation had existing UK legislation which described their governmental structure, and this was affirmed in each colony's Terms of Union, which now form part of Canada's Constitution. The remaining three provinces were created by federal statute. Their constitutional structures are described in those statutes, which now form part of Canada's Constitution.

All provinces have enacted legislation that establishes other rules for the structure of government. For example, every province (and territory) has an act governing elections to the legislature, and another governing procedure in the legislature. Two provinces have explicitly listed such acts as being part of their provincial constitution; see Constitution of Quebec and Constitution Act (British Columbia). However, these acts do not, generally, supersede other legislation and do not require special procedures to amend, and so they function as regular statutes rather than constitutional statutes.

A small number of non-constitutional provincial laws do supersede all other provincial legislation, as a constitution would. This is referred to as quasi-constitutionality. Quasi-constitutionality is often applied to human rights laws, allowing those laws to act as a de facto constitutional charter of rights. For example, laws preventing discrimination in employment, housing, and services have clauses making them quasi-constitutional in ten of thirteen jurisdictions.

### Amending provincial constitutions

Section 45 of the Constitution Act, 1982 allows each province to amend its own constitution. This applies, for example, to provincial statute laws like Constitution of Quebec and Constitution Act (British Columbia). However, if the desired change would require an amendment to any documents that form part of the Constitution of Canada, it would require the consent of the Senate and House of Commons under section 43. This was done, for example, by the Constitution Amendment, 1998, when Newfoundland asked the federal government to amend the Terms of Union of Newfoundland to allow it to end denominational quotas for religion classes.

A small number of statutes within provincial constitutions cannot be amended by a simple majority of the legislative assembly, despite section 45. For example, section 7 of the Constitution of Alberta

Amendment Act, 1990 requires plebiscites of Metis settlement members before that Act can be amended. Courts have not yet ruled about whether this kind of language really would bind future legislatures, but it might do so if the higher bar was met when creating the law.

Three amendments to provincial constitutions in the 2020s have been controversially framed as amendments to the Constitution Act 1867. These are Quebec statutes purporting to add sections 90Q and 128Q and a Saskatchewan statute purporting to add section 90S. Because the Senate and House of Commons did not authorise these amendments, they would only have effect if they are amendments to provincial constitutions under the section 45 amending procedure. Constitutional scholars are divided on the validity of an amendment to a provincial constitution framed as an addition to part of the Constitution of Canada.

#### Vandalism of the proclamation paper

In 1983, Peter Greyson, an art student, entered Ottawa's National Archives (known today as Library and Archives Canada) and poured red paint mixed with glue over a copy of the proclamation of the 1982 constitutional amendment. He said he was displeased with the federal government's decision to allow United States missile testing in Canada and had wanted to "graphically illustrate to Canadians" how wrong he believed the government to be. Greyson was charged with public mischief and sentenced to 89 days in jail, 100 hours of community work, and two years of probation. A grapefruit-sized stain remains on the original document; restoration specialists opted to leave most of the paint intact, fearing that removal attempts would only cause further damage.

The investment group is with M.S.P-M.C.G Murder City the standardized intelligence service & program able to take over any one area of or an entire countries borders & airspace to restore & maintain as a single independent or with collective groups within & screen connected internationally archiving current & past practices while utilizing modern efforts

This includes the ability to take control of Government of Canada & the Canadian population, Private Sector within Canada like any other country to protect international investments & those connected then others separately

Government restructure & heightenedo domestic & international security

If private & corrupt public threat labs successfully take control of Government & Private Sector, Media, Banking & private or public infrastructure then H.O.R.B has to administer a country wide covert private take over of all areas using M.S.P-M.C.G Murder City practices

There is no choice if monitored numbers of operating standardized labs versus labs that become threats then threat lab numbers increase above levels we cannot control & overpower

Domestic & international laws are administered while the Government is restructured to address this situation on a social - financial level

Modern private Martial Law & an effort to maintain a public status quo with real factual & entertainment based media content as as distraction to maintain public safety & a status quo to void riots or retaliation in confusion by one or more groups using advanced social engineering practices

KILLING TO COVER UP CRIMINAL EFFORTS

Voiding criminal liability through mass executions & efforts to downplay, cover up & discredit the operating labs & everyone involved & connected past & present including since deceased

Voiding panic while we administer efforts to trace signals, investigate labs & calculate financial damage options to re-assimilate the affected versus standardized labs with court orders & health board orders then different groups for or against threat labs or those that become a threat affecting one or more persons ages 0-17, 18-100+ or those since turned age 18

## THE ONE ONTARIO NEUROLOGICAL TECHNOLOGY LAB

The clusters operating affecting the CIG SB - RBK Seven

People & groups caught operating at & with the responsible locations affecting to brutally execute the CIG SB - RBK Seven are worse than Hamas operating from locations in Ontario Canada prior to 1999 & post with domestic Canadian, US & international interests

To cover up & void people & groups involved their legal & criminal liability for operating between 2012-2024 & prior to 2012 dating back before 1999 the idea was to wirelessly execute subject candidates while banding to cover up all traces of information pertaining to their existence then any information or documented - recorded evidence connected to the responsible locations housing full body wireless neurological technology equipment used to monitor & or monitor & control the subject bodies 24/7

Target subject candidates held down in simple lives as prisoner slaves or executed using detention & execution or a combination practices

Hamas Terrorists - Reminiscent of those operating at or with & separate from the one Ontario neurological technology lab clusters

## ISRAELI ATTACKS - HUMAS

Hamas terrorists launched an unprecedented surprise attack on Israel on Oct. 7. More than a month after Hamas terrorists launched an unprecedented surprise attack on Israel and infiltrated the country by air, land and sea on Oct

Rothschild - Savage - Bennett created & monitored the structure of Israel like multiple other countries with international investments since prior to B.C & years before 1200 as the connecting Seven families bloodlines

## CRIMINAL COVER UP EFFORTS 2012-2024

Efforts to hold captured wireless prisoner slave subject candidates down using simple word distractions o scramble thoughts with advanced detention or execution & a combination of techniques

People requesting to make subjects brain dead & under wireless lock down with no explanation

Ostracization of those that speak out & efforts to fracture any or all bones leading to death or severe temporary & permanent injuries revoking the target subject bodies ability to function mentally or physically & vocally

Documented & recorded efforts taken against H.O.R.B - CIG SB - RBK Seven

#### IN SOME COUNTRIES

We will just supply EEG & taler tracing equipment to protect their Government & citizens safely from internal - external threat labs while in other countries we will take over Government & Private Sector

#### IN CANADA 2024

Government is compromised at 50-90%

One-six devices used to monitor past - current employees then those elected past-present

Standardized labs  
Threat labs  
Labs that became a threat

Domestic Canadian & international interests are involved in monitoring & or monitoring & controlling these persons & those connected while a structured standard is upheld to the public through media efforts

The numbers of those compromised & affected by non-standardized labs in Canada has increased by different domestic & foreign international interests separate from domestic & international investment or investors yet that is also a channel invested at a lower percent in these efforts

Government of Canada's public CSIS - CSEC - DND J2 is advanced yet not as advanced as M.S.P-M.C.G Murder City within the borders & airspace of Canada

Canadian population numbers affected by different neurological sciences & technology labs range from 20-99% in all areas of the country while threat labs have executed hundreds into thousands while contributing to millions of deaths globally

#### EFFORTS TO COVER UP

Execute, dismantle & destroy the devices then erase all signs of the subject candidate then say who knew, subject candidate who then if anyone asks the subject candidate all of a sudden had mental problems and died by suicide or accident & or you don't know or didn't realize they existed

This is the average normal effort by threat labs to cover up what they had done & do to subject candidates on a 24/7 basis in their professional & private lives

Monitor & or monitor & control of subject candidates using their bodies & leaking their memories out including all experiences then discrediting them while suppressing & restraining them holding them down painfully revoking vocal, physical & psychological - mental control of the body wirelessly

Brutal mistreatment then painful killings of those they prey on using different people operating at or with the responsible locations housing the wireless equipment to accomplish enabling their efforts daily past & present

Simply put. Thousands of efforts applied

Connect the body, use the body, leak memory, execute. Walk on!!!

MURDER CITY - PURPOSE

An advanced international program

Security intelligence utilizing offline, online, telephone & mobile channels then advanced technologies

The basis in basic form is described in the H.I.3 case to the public

Section 1

M.S.P

Modern separatist

Investigators monitoring

Section 2

M.C.G

Murder City

Man power in place to carry out covertly as ghosts

This is to protect general populations from dangerous groups, terror groups, corrupt areas of Government & Private Sector then families

Murder City administers the most advanced & intensely dangerous efforts in forcing legal resolutions while staging the most advanced scenarios for resolution efforts

Five Murder City groups monitor all others & other groups 24/7 alongside & separate from other programs in over 60 countries

One major concern is so private or Government groups cannot execute innocent good people using advanced wireless neurological technologies or through other efforts covertly

Developed by Dr Nic Bennett - Sydney Nicola Bennett with then Michael Persinger & Dr Mary Koslov 1990's-2000's

## TRACING WIRELESS SIGNALS

The ability to use an EEG cap & wireless tablet to trace signals from an affected person to the GPS location housing the device so we can investigate those net entering & exiting past-present then those connecting past-present operating through different offline, online, mobile & telephone channels of communication

We can also attach connecting the body then detach disconnecting the body & extract memories birth - present time to hard drive

## ADMINISTRATION OF DRAFTS & PAID PERSONS

Main lives, secondary lives & a work life balance

Two lives or more in one from main doubling as a Murder City & approved connected personnel interest

Moles & double - triple agents within or outside under investigation through advanced ghost auditing techniques monitoring 24/7 on daily performance prior to payment through investments on a small, medium or larger scale

A ghost convert connected grid system utilizing people in Government & Private Sector, private groups, banking, media, high profile or celebrity then sports & entertainment, medical or dental related

## FACTS ON NEURO-TECH IN CANADA

Two confirmed labs monitoring

The lab that has Rod, Marie & Jordan of the four Bennett's separate from other labs has Danielle Campbell hooked up to full body neurological technology lab equipment prior to 1999 yet M.S.P-M.C.G Murder City also has their bodies hooked up to investigate & monitor prior to 1999 or prior to 2012

Jordan & Danielle like others are left unmanned at work monitored unlike others

People lured in prior to 2022, prior to 2012, prior to 1999, prior to 1992, prior to

M.S.P-M.C.G Murder City is an advanced international security intelligence program with Government as a Private Interest or operating privately often investigating & monitoring different people, places, the

economy, investments then Government or Private Sector & groups or families which was established between the 1990's-2012 utilizing different technologies & practices offering clients advanced daily briefings on over 25,000 subjects of concerns monitoring 195 countries borders & airspace in detail then international waters while not taking sides over conflict

The one Ontario neurological technology lab cluster locations include multiple locations versus other labs connected or separate labs operating separately

These labs operate with people subject candidates had or had not met at the location daily past-present then separately operating with people the subject candidate had or had not met including those in past or present professional life settings & their past & present private lives extending to those sharing similar or different interests, holidays or vacations

Unmanned monitored  
Partially to fully manned

Normal, detention or execution practices or a combination

Some people are connected to one or two devices or one to six monitored & or monitored & controlled 24/7 by those invested at & with these labs

To unman & settle calculated damages depend on conscious choice versus partial to full control & daily experiences including injuries, pain, social isolation & financial losses

#### TRACING - SIMPLE DESCRIPTION

All citizens are at risk similar to Covid 19 requiring vaccinations administered by the NHS - UN global standard then

M.S.P-M.C.G Murder City - Security

Your brain has to be connected to a safe wireless device to monitor your body & track your whereabouts 24/7 leaving you still in control of your body with privacy while only your legal representation & a health board of screened approved professionals can see the device with or without you under legal contract approval

Threat levels 0-1 are unmanned monitored

Threat levels 2 are monitored as persons of interest

Threat levels 3-4 are monitored & controlled by different teams & software intervention

All non-approved non-standardized labs will not be able to operate as they will be traced & investigated for every citizen's safety, privacy & rights

#### PURPOSE - DOMESTIC & FOREIGN THREATS

This is so a foreign threat country or group within their countries or our own operating in secret cannot connect your body to a device to take control of your body locking in your conscious mind so you are a prisoner inside your body allowing them wireless control of your muscles & entire body so they can send their voice through mouth for you & speak into your skull & ears

The human body can be connected to one-six of these devices allowing multiple labs to monitor you 24/7 & even take vocal, physical & psychological - mental control of your body

This is all I, Dr Nic Bennett - Sydney Nicola Bennett can do to protect the lives of the majority of most populations on planet earth using my investment group & connected Royal - Elite security defence program with advanced neurological sciences & technology with connected advanced programs

Dr Nic Bennett CIG SB - RBK Seven

#### LOCAL AREAS IN NORTH AMERICA

1980's or prior. 1990's-2012 or later

Administration of full body wireless drone robot puppet ventriloquist doll technologies to monitor & or monitor & control citizens by different domestic & internationally connected standardized or threat labs & labs that became a threat

Minors ages 0-17 connected & left connected or disconnected after review & memory extraction then monitored through other efforts

Adults ages 18-100+ connected & left connected or disconnected after review & memory extraction then monitored through other efforts

75-99% of a local population including new births

50-75% of a local population including new births

25-50% of a local population including new births

10-25% of a local population including new births

Efforts by different involved or newly involved & connected or separately operating labs or interests to looking to write off the labs as not real, a hoax, a conspiracy while expecting to execute subjects & any one person or group that speaks as to silence & operate in secret

With January 2016 Havana Syndrome technologies released anything involving neurological sciences & technology fall under that category including classified programs using variations of the technology or declassified programs using variations of the technology

Investigating people without then knowing using different people, groups then offline, online, mobile or telephone channels in their professional & private lives

Cypress & Monarch are intertwined within yet Murder City uses everything described in the H.I.3 case then a series of advancements above with collected international data archived from earth's history & the daily monitoring of 195 countries, international waters events past-present then thousands of documented legal cases in multiple countries using automated efforts & now AI software tools

Rotational programs with layered staged distractions & advanced analysis efforts to study, investigate & gain an understanding of motivations & life cycles in accuracy against experiences within or falling outside of law

Dr Nic Bennett - Sydney Nicola Bennett

Security, maintenance & insurance rates then utilitie's & taxes all together are important monitoring factors in residential or commercial property sustainability versus other investments

I learned what law was by ages 7-11 as I used to rip off chump change from my parents vehicles then house & vodka tonics yet after that I had focused on one's earned through chores & work then I was very careful & strategic using basic finance books on band or at libraries with a combination connecting with medical - business related or anything we had on hand then later a computer we had as the family business computer

#### NEGOTIATIONS IN A GLOBAL CEASE FIRE

The one Ontario neurological technology labs cluster locations cost everyone involved & connected then 41 million Canadians minus just under 500,000 their lives in a counter attack using the same wireless technology for refusing to settle & unman prior to 1999 & daily since with the Rothschild-Bennett family

M.S.P-M.C.G Murder City is now in place internationally as an alternative Government - Private Interest or Private Interest Intelligence option that is partially public & advanced on a private level to void such activity & to maintain laws, save lives & sustain life for all animals, insects, mammals, rooted life & human beings on earth from threat labs

I, Dr Nic Bennett - Sydney Nicola Bennett set up the program based on my own experiences between 1985-2024 to void this overall larger threat that has presented in over 100 countries slowly between the 1990's-2024 with & without people knowing publicly or privately

177 IQ - Social Extrovert. Social & Educated yet this is a real situation & my life is one of billions on the line

Of 8.1 billion some interests wanted a population of 500 million - 2 billion while I see a controlled & monitored 5-6.2 then growth in a sustainable 10-15 billion possible but a cap of 15 billion living humans versus monitored numbers of insect, animal, mammal then rooted ecosystem life to sustain the planet & atmosphere

Specific European - Asian & North American interests are caught with international operating with under 90 million connected to just under 1.5 billion of 8.1 billion people between 2012-2024 & prior to 2012 dating back before 1999 expecting to just take control of people's bodies & us then from unmanned to partial & fully manned before killing them after reviewing memories laughing them off into death slowly & painfully using wireless technology while deleting their existence & everything connected turning people they met against them to isolate from or executing those people to in order to cover their tracks as to not get caught

Ukraine - Covid 19 - Neurological Technology Threat labs for example long with multiple internal - external efforts balancing an effort for control to benefit specific countries & groups within for total control & take over without affect

Leaders & one or more standardized labs & threat labs affecting them & others in Government or Private Sector then private interest groups collectively connecting internationally

Layered distracted covers & efforts to operate covertly & operating undercover then smaller groups using belief against fact to shut down & cover up on behalf without realizing the real larger picture at play & motivations

It is Elitest game

Economic shrinkage

## **Standardized versus Threat Labs**

[March 05, 2024](#)

NEUROLOGICAL SCIENCES & TECHNOLOGY

### Standardized versus Threat Labs

Standardized policies, practices or standards with law in labs with a court order & or health board approval to have a candidate connected to a device

Non-standardized labs that disregard all rights, privacy & practices with no law considered affecting subject candidates & those physically around their bodies 24/7

NEUROLOGICAL SCIENCES & TECHNOLOGY

The purchase of Human Slaves wirelessly

The one Ontario neurological technology lab cluster location operating with corrupt persons in Government within & outside of Canada then separately the Private Sector with private connected interests

Stakeholders - Threat Lab wireless slavery rings

The initial location housing the full body neurological technology equipment - main device

The final location used to house the full body neurological technology equipment - main device after the subject is lured in & connected to be monitored & or monitored & controlled 24/7

Physical location owners - stakeholders

People, groups, companies, brands & businesses that pay in a percentage to own the subject candidate body using the full body neurological technology equipment - main device

Volunteers & guests brought in on a 24 hour rotation at different times or regular intervals. Directly responsible wireless slave ownership of a human, animal, insects or mammals

Connected persons that operated with the stakeholders (physical location & device owners). Accomplices connected to wireless slave ownership of a human, animal, insects or mammals

## SEXUALITY - GENDER H.I.3 LAWSUIT

One area within the lawsuit pertaining to Dr Nic Bennett - Sydney Nicola Bennett

People taking control of the body from unmanned to partially to fully

Locking in the consciousness to take vocal, physical & psychological - mental control of the body

People taking turns & forcing subject candidates to look at males or females & gender variants in sexualized ways while those at the device make sexualized comments distracting & harassing them in the process

People involved forcing the eyes to look down, up, side to side or in a 360 degree motion then stating it is rude to stare

People involved taking physical control of the body in safe average speeds or slow, extremely slow or fast & extremely fast ways with or without causing pain or injuries. Temporary or permanent injuries often requiring surgical medical attention

If the subject candidate is viewing or watching something on an electronic device or if someone is in their peripheral vision those operating at the device make sexualized comments & touch the bodies genitals & anus-rectum while bulging the eyes & forcing the eyes to look at the objectified person as a sexualized object regardless of age or gender & gender expression

Efforts to force subjects to look at chest - breast, buttocks, crotch areas then the face in a sexualized way for the fun & enjoyment of those at the device often unnatural & inappropriately immature for the subject body

These people then claim they could hit on & pick up anyone regardless if they are in a relationship or single

Film term references are often used as those involved like to use Hollywood movies & film making terms

Button shot (the butthole)

Butt shot

Pussy shot (baby maker from the front or back)

Face shot (the kisser)

Thousands of others

## HOW IT FEELS AS A SUBJECT CANDIDATE

Now people involved do this 24/7

Reiteration of what you think, imagine & remember then comments pertaining to going through your memory

Reiteration of what you see & hear

Reiteration of their opinions while attempting to take partial to full vocal, physical & psychological - mental control

Voice to skull - ear

You have to think, imagine & remember (mentally function) multi-tasking while all of this is happening distracting you as a subject body & it's like a radio is implanted into your brain that you can hear where those at the station can speak into your head without anyone around your body knowing (voice to skull-ears)

Voice through mouth

You have to work around people disabling your ability to vocally speak for yourself in anyway you could so they at the device can send their voice through your mouth for you

In context

Out of context

While watching through the eyes & monitoring hearing on the device of the subject body (candidate)

Ability to control all muscles & facial expressions then limbs, hands, feet, fingers & toes then internal organs - organ function

It's like Russian Roulette if a non-Standardized lab is involved as they could do or say anything

Lung - Breathing control

You can control breathing

Normal - Detention - Execution practices

Unmanned - Partially to Fully Manned locking in the consciousness

Pain - efforts to drain energy - temporary or permanent injuries

Psychological warfare

Vast Capabilities - Vast Techniques

Seamless or alternative handling

People acting like themselves, others they met or different characters using the subject body for fun & enjoyment often negatively affecting the subject & evening frightening or confusing those around the body as it's not natural for the subject body candidate to act like that so it is not seamless handling

Third Eye

Ability to flash static or moving images into the pineal gland - third eye within the conscious mind so the subejct body can see only while those around the body can see leaving them multi-tasking mentally & physically

## Heads Up Display

Ability to use team or conscious controlled software & heads up display with a watermark so only the subject body can see with vast capabilities including scanning of objects & people or animals, insects or mammals & rooted life or ecosystem

## COLLECTIVE LOT OF FU\*KING LOSERS

Every human being that had physically entered the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven & four Bennett's are nothing but want to be fraud low life fu\*king loser people that think yhey are the better people because they decided so

They are all fu\*king losers that operated on past & or present 24 hour rotational teams with volunteers & guests flown in or driven in from within or outside the borders & airspace of Canada

The majority of voluntary or involuntary accomplices are fu\*king losers

Persons & groups connected, contacted, mentioned or referenced then those connected operating in the past or present through different offline, online, mobile & telephone channels of communication within or outside the borders & airspace of Canada

A collective of little fu\*king want to be's which attempted to connect with mainstream & allegedly respected diverse groups within Canada, USA then internationally within the 1.5 billion enemy to the 2-5+ billion trusted or connecting person of interest within in the 8.1 billion global population

Little fu\*king vile, parasitic, degenerate dirt bag dressed in disguise acting like something they shouldn't

These disguised better people despite having sabotaged others in their wake decided they are more deserving in their separate lives based on experiences so they should be the one represented & to speak to what they would assume to be despite realities of people's life cycles in a professional & private life with successes & failures then how they can be socially, interests then multiple factors people often overlook that is them as a person

## THOUSANDS OF EFFORTS TO SABOTAGE

People doing impressions & screaming random comments into subject candidates skulls - ears & through their mouths often to socially sabotage while inflicting pain to drain energy while revoking their ability to mentally & physically function causing pain & injury often while mistreating them like little children with problems (of ages 0-2)

## MY NATURAL SELF - ABILITY TO ACT

Styles added in body language or vocal - vocabulary

Switch from natural self to full character birth to present time or scene

I, Dr Nic Bennett - Sydney Nicola Bennett am generally just a smart average educated respectful man with strong morals, a conscience & emotions aware of others separate lives & my own yet I also have advanced social then separate acting & writing skills

Good manners - minding ones own age appropriate behaviours through a structured effort which is described in the H.I.3 case accurately word for word

I deploy acting within to deal with different situations partially to full character use or variations with a masquerade strategy as it is an effective tool

To react to people based on a safe standard then subtle base from how they treat you

To respond to people based on a safe standard then subtle base from how they treat you

To communicate to one or more persons based on a safe standard then subtle base from how they treat you feeling out the crowd

A french mime. It's all still & a moving act with no vocals silent

Add vocals & it's a communicative human being

People do not understand often that you can develop & control your social skills

## COLLECTIVE GROUPS

The cliques as children, teenagers or adults fit into different demographic categories or hybrids then focus on their way in life socially & financially yet should not preach or negatively affect others ways

Your way of life preserved within the law

## SAFE HANDLING VERSUS AMATURES

Neurological Sciences & Technology

Seamless Handling with supervisors

People physically around the body cannot hear those at the device or tell & it is in context socially & very well orchestrated with the subject candidate or against their will & or a combination

Amature Handling with supervisors

People physically around the body can tell because of erratic, unpredictable partial to full control of the body in different ways taking vocal, physical & psychological - mental control locking in the consciousness

Acting as themselves or the subject candidate or characters & others using the body in different ways

Reiterating what the subject body candidate thinks or imagines & remembers interrupting what they are doing saying it back into their skull-ears or through their mouths regardless if people physically around the body can hear

## UNDEREDUCATED GAY AUTISTIC

The Canadians keep demanding I, Dr Nic Bennett - Sydney Nicola Bennett since the 1990's-2000's am to submit to being an undetected fraud want to be low income poverty stricken gay male autistic with mild, moderate or severe symptoms of aspergers a high function underdeveloped rigid condition while I am to also have an auto immune digestive tract disorder like ulcerative colitis, chrons or diverticulitis as an irritable bowel syndrome condition so they have a cover to have my body connected to the one Ontario neurological technology lab clusters full body equipment used as monitored & or monitored & controlled assisted wireless drone robot puppet ventriloquist doll living 24/7 by different teams prior to 1999 & post

These people demand this & even had medical doctors & specialists lined up to back them in different areas of Canada

My actual separate medical diagnosis is nothing & the one Ontario neurological technology lab efforts expected to change my gender to transgender during an investigation against them using transgender care with different doctors & specialists

I have only a neck & spine injury the one Ontario neurological technology lab caused otherwise I am perfectly normal, fully developed & educated, knowledgeable & skilled

I did agree to gender variations for different projects & an investigation for the H.I.3 case yet not to physically change my body using hormones or surgery as a permanent effort

My effort was just to alter my appearance using weight gain or loss then my physical skeletal structure & social - acting skills only for different purposes

Airdrie - Calgary & Montreal - Sudbury evaluations are accurate with unbiased Toronto & USA - International evaluations

Noted physical injuries only & no mental condition or hereditary, late onset or trauma based

The people involved between 1990's-2011 considered me a threat level 0-1 separate from 2012-2024 wanted me to be a care free obsessive psychopath versus a rigid bold autistic of mild to moderate & severe psychotic like responses with inability to process information between 2012-2024 that needed to be stopped or controlled 24/7 as a threat level 3-4

Some children, teenagers & adults were lured in for something else & connected to full body technology so threat or standardized labs could go through their memories & connect with people at & with the location to figure them out while others had a court or health board order to do so based on different factors

Figuring people out without them knowing who is involved or connected to the lab housing the device connected to the bodies while mapping everyone they had met past-present intervening in their private & professional lives

Purpose & use

A physically underdeveloped person may have a hereditary, trauma based or late onset condition medically

A socially - psychologically underdeveloped person is often basic, aggressive & does not process information well so they cannot override basic feeling in basic emotional response in communication, reaction or response requiring more education

Rod & Marie taught Jordan & Nic to recognize these attributes then react accordingly in a respectful way towards while developing themselves & their own separate addictive to their approach as individuals people slowly between ages 0-6, 7-11, 12-17 & later ages 18-25+

Toronto

Upper Canada. Then Young Street War. Modern international wireless enslavement

ST LAWRENCE HALL -----

Designed in the Renaissance Revival style by architect William Thomas, the elegant three-storey structure seems almost out of place on busy King Street East (which only adds to its charm)

On the day of its opening in 1851, George Thompson made a speech on the evils of slavery. Several important Abolition meetings were even hosted here when Canada welcomed Underground Railroad refugees from south of the border

Modern underground global wireless slavery railroads operate different yet are relevant

The neck & spine

Threshold method to almost fracture or bone fracturing

All bones, limbs, hands, fingers, feet, toes & skull, facial features & neck - spine

Tasering

Electrical effect on the skin & within muscles then internal organs from mild, moderate to severe & extreme

Squishing - Brain

Squishing the brain or & brain & eyes in then efforts to scream into the skull ears causing bleeding from the ears & hemorrhaging of the eyes

Muscles

Circulation - blood flow

Restricting oxygen in lungs taking control of breathing in a mild, moderate to aggressive way using thousands of techniques & blood flow restrictions to make the limbs, hands, feet, fingers, toes or face numb then rendered unusable

Ability to tighten & loosen all muscles head to toe focusing on one area or multiple areas at one time in thousands of different ways

The full body drone robot puppet ventriloquist doll technology used to monitor & or monitor & control the body head to toe

A wireless signal connected through the pineal gland unlocking wireless capabilities including electrical signals sent through the muscles & body head to toe so the conscious mind within the brain sending natural neuro-receptor signals to control the physical & vocal - psychological aspect of the physical body is forced to share control of the body with the natural conscious mind locked in partially to fully from unmanned in control so those with the wireless device can take partial to full control of the body leaving them locked in inside fighting for control of their body using different techniques while those with the device use different techniques to control their body wirelessly

Six standardized labs connecting. One separate & two threat labs infiltrated operating within & outside North America affecting those within or travelling to & within

Dr Nic Bennett - Sydney Nicola Bennett on a flight controlled by the one Ontario neurological technology lab

Sitting next to friend & security interest using the scene with Jack & Adam in character disregarding their film in comparison to a situation that was staged in the H.I.3 case in a classified flight Palm Springs to Phoenix 2022 November

dramatic flight pattern for the private flight in response to the investigation into threat labs, labs that became threats then standardized neurological sciences & technology labs in Southern California, Toronto & different North American & international destinations connected

<https://m.youtube.com/watch?v=DzUc3Eqzzos&pp=ygUbYWRhbSBzYW5kbGVyIGFpcnBsYW5lIHhjZW5l>

The flight if a high profile investigative team were not on board could have been downed including forced use of a qualified pilot team operating a neurological technology controlled pilot or AI flesh not pilot to destroy the bodies of wireless or traditional prisoner threats while insurance voids during clean up to neutralize a flight of threats

This is one of 1000's of staged variables in order to take care of screened valid versus invalid concerning persons of interest at threat level 3-4 where financial resources are unavailable to monitor or incarcerate

Multiple factors to benefit from & a break even for profit approach to the situation in an investigation to justify

For profit resource systems are not taxed yet threat levels 0, 1 or 2 then 3 that can be reformed to 2 or lower can be salvaged while levels 3-4 are a financial burden & tax on the system

Execution orders for one or multiple & staged efforts to destroy old equipment resources with connected investors can include downing a ship, plane or other staged accident while different people & variables are agreed the causation despite in such separate circumstances from natural when required after all options are exhausted legally & privately

New births life cycles can justify with new systems in place in terms of education & economic safe structures

THE ONE ONTARIO NEUROLOGICAL TECHNOLOGY LAB

Sabotage 24/7 using whoever, whenever including people I met & did not

Purpose & job of those operating at & with the one Ontario neurological technology lab cluster location in question housing the full body device connected to my body prior to 1999 & post (after)

To illegally oversee what I am doing covertly & to monitor my sight, hearing, thought, imagination & memory 24/7 with ability to take partial to full control of my body using normal, detention & execution or a combination of practices leaving me often drained of energy in pain healing from temporary or permanent injuries that may require medical attention

A job to discredit, suppress, disrespect, shut down & restrain then credit themselves or others using comparisons while attempting to ensure I, Dr Nic Bennett - Sydney Nicola Bennett cannot do my job properly or enjoy my consciously chosen daily schedule

While I am on scheduled workplace hours directly, virtually while travelling or virtually then in my private life these groups rotating through connecting at or with the responsible location intervene rudely & inflict pain, injury while attempting to revoke my ability to do what I am doing so I cannot waisting my time

I am left finding ways to work around these efforts to continue with my professional output while sticking to my loosely planned structured daily, weekly, monthly & quarterly schedule in my life

Multiple on-going & past criminal acts are documented & recorded associated with these efforts taken against me by those responsible operating at or with the one Ontario neurological technology lab cluster locations

This is how it has been since 2012 between 2012-2024 at the request & demand of connexion stakeholders with supervisors & operating handlers filtering through operating at & with the responsible location in question after separate efforts taken prior to 2012 dating back before 1999

This especially between 2012-2024 with people brought in to debunk, investigate, discredit & disrespect my perspective, work output & to invade, oversee then leak information amongst themselves & to competitors versus what my group & I approve for online access to the public

We, the CIG SB - RBK Seven approve of the H.I.3 case via Sydneys.Sphere as the access point

What people vocally say into the skull - ears or through the mouth of my body & what I think, imagine or remember are not the same yet if they attempt to reiterate what I think, imagine or remember it is often 50% accurate as they could reiterate that into my skull - ears or through my mouth Ridley interrupting me while administering different efforts to restrain me physically & suppress me psychologically

We will be charging those operating at & with the one Ontario neurological technology lab cluster locations that forced Rod & Marie to connect with & to post on Jackie Keller's Facebook profile between October 1, 2014 - March 2, 2014 as they were not supposed to have contact for what Jackie & those connected did to the Bennett family along with others operating

separately or with the one Ontario neurological technology lab cluster locations

The I live it people connected to the Jeannault (Jen-Oh) family between the 2000's-2024 can all sworn life in maximum security penitentiaries for banding together across Canada as they amount to the just under 90 million connected to just under 1.5 billion connecting between the 1980's-2024 that are not since deceased operating against the CIG SB - RBK Seven & four Bennett's

Accomplice to attempted murder then compound criminal acts in accomplice or direct over multiple years taken against the CIG SB - RBK Seven & four Bennett's

Ah, see ya later aligstor is in order essentially. Legally first then a private monitored swarm effect

Plead guilty or your life is altered in different by internationally connecting interests

A plea deal for less time or house arrest & or term conditional release monitored

Majority involved are looking at 10-25+ years in maximum security penitentiaries including minors since turned 18 or older & many minors ages 0-17 then adults ages 18-100+

H.I.3 Lawsuit - Four Bennett's

[Nic Nic Nic - Homeless Almost  
March 02, 2024](#)

Nic Nic Nic

EFFORTS TO MAKE THE FOUR BENNETT'S HOMELESS

A plan orcastrated to destroy their bodies, health & lives then image, character, credibility & reputation

We were informed that the one Ontario neurological technology lab cluster locations wanted the four Bennett's Rod, Marie, Jordan & Nic between 2012-2024 seized of assets, revoked privacy & control of their bodies vocally, physically & psychologically-mentally while expectations to take control of their

newly suppressed & controlled miniscule bank accounts while holding them down on public charge welfare social programs with very little money borderline or actually homeless with nothing but two travel bags for personal hygiene & minimal clothing, accessories & footwear then minimal access to laundry & minimal food, drink then controlled access to communication in terms of mobile & Internet for basic banking, access to a browser & entertainment then email or social media

One of other plans included expectations to hold the four down turning them against each other in homeless shelters or low income subsidized housing compounds in Toronto, Los Angeles, Coachella Valley or North Bay, Barrie, Orillia, Edmonton, Calgary or Vancouver in North America from the one Ontario neurological technology lab clusters then if anyone spoke out or if the four Bennett's did they would be ostracized as requiring mental health care then detention & execution practices would be or are administered

The efforts to hold the four down as homeless at the bottom left considered want to be threats under the watch & control of those operating at & with then separate from the responsible neurological technology lab cluster locations

People involved & connected even connected with different homeless shelters & low income options in USA & Canada on behalf of the four Bennett's acting with & on their behalf to set up options for them inquiring leaving a digital - physical paper trail

The efforts included many tactics similar to the movie Changeling to erase, cover up & rewire the past catering to those involved & connected to make general groups then those connected expect that the four were delusional & suffering from memory problems & the mental incapacity to understand the difference between what they experienced versus reality

The belief was created as layered covers for the one Ontario neurological technology lab clusters locations

I, Dr Nic Bennett consciously fought back & even worked to stop an Ottawa lab to get my friend Nicole Sydney Bennett out of a shelter in Toronto they tried holding her down in while I was in three shelters in Toronto the one Ontario lab tried holding me down in

We both almost ended up in an Indio shelter as the one lab fooled the Palm Springs Police department at one point when we were in Coachella Valley briefly between September 2022 - November 2023

Nicole is back living in a residence safely after efforts failed between 2022-2023 as am I, Dr Nic Bennett while separate efforts taken between 2012-2024 then other efforts taken prior to 2012 dating back before 1999

#### EFFORTS WITH ROD, MARIE & JORDAN

All failed due to the efforts with then Michael Persinger & Dr Mary Koslov then those connected & later connecting M.S.P-M.C.G Murder City groups connecting in over 25 countries

Jordan remained at PWC Canada & in Vaughan - Toronto while Rod & Marie remained in the Niagara Region in their earned homes

I, Dr Nic Bennett sold my past residences & gave up my travel residences while focusing on a very lucrative restructured portfolio

## THE ONE ONTARIO NEUROLOGICAL TECHNOLOGY LAB

Interest involved destroying our plans & demobilizing my muscles & neutralizing me like I was a threat all of a sudden with no explanation

My airport on my US soil as a Naturalized US citizen (2000's) large Global Elitist Investor to the USA & internationally

The details on standardized labs versus threat labs & those that became a threat are within accurately described in the H.I.3 case

Coachella Valley in California is 75% safe & 25% not yet generally safe for tourists including Joshua Tree & Yukka Valley

The pest took my personal Siamese cat not live cat for a investigative film which doubled as there in Palm Springs then while I posed as first line & a caregiver for a neurological technology first line interest with one of three-four labs operating in US & internationally connecting

I did not appreciate having to remain in he airport or having to sleep on airport chairs with security present while posing as a traveller distrubuting information over the H.I.3 Case

Robot controlled people that may be homeless "meth ice" addicts using bath salts & act robotic like yet...  
let's be realistic here

American Airlines instead of Flare

Wrong flight & miscommunications between US Government & international labs & areas of Government

I address these discrepancies in the Lola Sphere

LISA MIDDLETON THE THEN ELECTED MAYOR

The situation was handled separately by a Royal - Elite group in Southern California connecting with different groups & international groups

We used all efforts made by those operating at or with the one Ontario neurological technology lab clusters & those connecting separately as a distraction including efforts between the two parties operating separately from ours working with the airport in Palm Springs using the intercom & information desk people

There were separately church going homeless, first line posing as travellers in Government & connected security with neurological technology in the mix then others in a neurological technology program operating alongside or separate from different undercover & uniformed Government interests at the airport & as a grid in Coachella Valley for coverage connecting to other areas in Southern California

I made everything I was working on public for the H.I.3 case as a further distraction & to focus attention on the case without releasing undercover personnel of their covers operating & guest operatives connecting for advanced security & experimental security practice while we worked on multiple private interest topics connecting with international investments & a series of on-going projects between my restructure

There were people comparing conscious choice on product units or services then past private personal or business assets then activity specific clothing, accessories & footwear including memory based ages 0-6, 7-11, 12-17, 18-25+ including in 2022 with efforts to disrespect & state we should not have been allowed or did not deserve to do or earn what we had & or do what we did

Asking me what hotels I choose then my response in a variety from upper scale to mid level & a mix of affordable accommodations then a mix of tourist focused events or interests in Coachella Valley like other areas in California or other States when travelling for pleasure - leisure or to see family, work or to study under a contract term or longer term

The Ritz-Carlton was one on the list which I was later ragged on in Toronto temporarily by a young woman posing as Nicole Sydney Bennett while we had to get the real Nicole Sydney Bennett unmasked by an Ottawa lab with her wearing similar outfits to what we had in the past from the same clothing & footwear with two sides in Toronto working against each other while we worked on the third variable with three different areas of Government, Private Sector then separate groups & people at had in the variable of events that occurred while we focused on our separate goal using their efforts as a distraction

WE SAVED A FEW LIVES VERSUS OTHERS

People that should be subject candidates versus those that should be unmanned & re-assimilated successfully into society to support & control themselves

Those that should not have connected to neurological technology equipment in the first place

We successfully saved Nicole Sydney Bennett from a threat lab in Ottawa & worked or a deal with a Thousand Oaks Los Angeles lab for Dr Carly Koslov-Sumner yet the one Ontario neurological technology lab cluster locations refuse to settle daily between 1999-2024 over the four Bennett's

## THE FOUR BENNETT'S

The perspective of the four Bennett's

Every human born is in their own separate body & it is their separate life cycle of experiences

The four do not judge others & have their own separate way within the law as a guideline to self Govern decisions

Your daily schedule

Your interests

Your way to perform daily tasks

Personal perspective. Non-discriminatory towards all race, culture, gender, gender expressions, sexuality, education level & social or economic fluctuations in life cycles of experience yet very firmly specific on health, safety, career & style with personal, career & financial portfolio & interests. All sharing similarities & differences with a consciousness behind the eyes of different variations

## DIFFERENCES & SIMILARITIES

Jordan has slightly different interests growing up than Nic yet some similar or the same

The daily lives are loaded into 10 terrabyte hard drives & connected to 2-4 neurological technology devices crated or housed at the one Ontario neurological technology lab cluster locations while we negotiate to crate to move & store unmanning permanently

## FALSE CLAIMS - EFFORTS TO COVER UP

The one Ontario neurological technology lab cluster locations have hundreds into thousands of false claims including mental state - nervous break down claims of the four

Bennett's to cover up or justify past & on-going efforts despite manufacturing such from the responsible locations from unmanned monitored illegally to partially & almost fully controlled faking such locking in their consciousness

Use to saws & chainsaws then past extended family owned Castle Building Centre in Callander, Ontario, Canada while Rod owned a food brokerage & business the maintained stock market & other investments

Efforts taken against Rod, Marie, Jordan & Nic Libel - Savage - Stargrat - Bennett

Canada as a population & country is over now in response & retaliation to lack of negotiations between 1999-2024

41 million people minus those decreased including new births will be knocked into one - six neurological technology lab devices & monitored & or monitored & controlled then slowly put through 1000 times worse mistreatment than the one Ontario neurological technology lab cluster locations did to the four Bennett's between 2012-2024 after separate efforts taken prior to 2012 dating back before 1999

The Canadians as a population traded their lives on earth to do this to the CIG SB - RBK Seven including the four Bennett's

Every Canadian citizen will be monitored & or monitored & controlled by one - six labs then their lives cut short from average of ages 50-100 down to 20-50 then those over 50 experiencing less time on earth slowly & painfully in response & retaliation over the H.I.3 case & efforts taken against the four Bennett's & CIG SB - RBK Seven between 2012-2024

Any human being that has citizenship outside of Canada that operated at or with the one Ontario neurological technology lab clusters locations affecting the four Bennett's or & CIG SB - RBK Seven loose their lives early in the same way wirelessly just 1000 times worse & kept alive condensed

Every Canadian will not exist with just under 500,000 remaining after 2028 in response & retaliation over these attacks

We do not need the guilty 1.5 billion connected to the guilty 90 million on our planet. Any one of them with careers of any kind will include archiving works of any public or private interest while they are decreased or serving life sentences

TAKEN OUT TO THAT BALL GAME

Dead. Death. Gone. Bye. Fu\*k off

Unfortunately 1.5 billion people are going into the ground. They are being taken out for what they did to people they are not throughout their lifetimes

I, Dr Nic Bennett will be living where I can have a helicopter that can lift a vault of times in a natural or man-made disaster to safety, guns & stockpiles to secure the perimeter then walls of intermediary devices so non-screened persons are screamed out the compound like a maximum security facility where you don't enter without permissions unless you want to be injured, walk as a wireless slave robot or to die right on spot with a illegal in the head

Strict in one's private life & professional life disciplined with self control, obidience & strict on laws with daily schedule of practice

Some people are lazy or slobes yet judgmental

I don't. No time for that while I am alive

I don't put up with people's sh\*t

#### WELL DOCUMENTED DATING DRAMA

The girl was desperate & as a roommate wanted to date & be a couple with me yet I had someone else & because I turned her my roommate down expecting her to do well with someone else as a dating partner than myself while I focused on the lady I was more interested in dating that suited my needs the girl, her as a roommate became secretly dangerously mad & made false claims then turned people against me as a result because she could not have me as her dating partner & she as a stoner delusional chic at times tried to claim she was in fact my girlfriend even to my actual with an agenda that faded were she wanted to turn people against me in hatred despite the fact I helped her financially for just under a year in Vancouver & North Bay while I even had my family bring her for eye surgery

Not cool... she was even gifted items & she had the nerve to ask for more money like a vulture above while my income & savings covered my expenses while I even covered hers

I then left Shelly for Jackie in 2007 & she Patricia moved out after I brought her back to North Bay from my time working & studying in Vancouver before I returned to Vancouver in 2008 temporarily before Ottawa

I, Dr Nic Bennett had other roommates between the 2000's-2024 as I am social

I had helped a few many people financially & in different ways in their separate or connected lives

Carly, Tekari, Shelly, Jackie, Anna, Nicole & Tatiana then inbetweeners chosen versus dictated or staged due to the H.I.3

Catering to the educated normal ladies versus those less so falling short

The normal respectful do not negatively affect your image, character, credibility & reputation or turn people against if they do not get what they as selfish people want 24/7 as high maintenance professions to maintain

There way or the highway while you pay & they do whatever they want including behind your back while your a sucker until they move on often with your earned efforts without you laughing as they will even negatively affect you with those you knew & new people in your new separate life that is allegedly amicable whole they try to look superior in competition to you with others so you look like sh\*t

The one in a millions want you to be jealous oh so jealous while your new life sucks & you hate life

Your professional life & private life

Get all gussied up to suck my d\*ck

## DISORGANIZED BASIC ORGANIZATION - HUMAN BODY ANATOMY

Human anatomy is the study of the shape and form of the human body. The human body has four limbs (two arms and two legs), a head and a neck which connect to the torso. The body's shape is determined by a strong skeleton made of bone and cartilage, surrounded by fat (adipose tissue), muscle, connective tissue, organs, and other structures.

The spine at the back of the skeleton contains the flexible vertebral column which surrounds the spinal cord, which is a collection of nerve fibres connecting the brain to the rest of the body. Nerves connect the spinal cord and brain to the rest of the body. All major bones, muscles, and nerves in the body are named, with the exception of anatomical variations such as sesamoid bones and accessory muscles.

Blood vessels carry blood throughout the body, which moves because of the beating of the heart. Venules and veins collect blood low in oxygen from tissues throughout the body. These collect in progressively larger veins until they reach the body's two largest veins, the superior and inferior vena cava, which drain blood into the right side of the heart. From here, the blood is pumped into the lungs where it receives oxygen and drains back into the left side of the heart. From here, it is pumped into the body's largest artery, the aorta, and then progressively smaller arteries and arterioles until it reaches tissue. Here blood passes from small arteries into capillaries, then small veins and the process begins again. Blood carries oxygen, waste products, and hormones from one place in the body to another. Blood is filtered at the kidneys and liver.

The body consists of a number of body cavities, separated areas which house different organ systems. The brain and central nervous system reside in an area protected from the rest of the body by the blood brain barrier. The lungs sit in the pleural cavity. The intestines, liver, and spleen sit in the abdominal cavity.

Height, weight, shape and other body proportions vary individually and with age and sex. Body shape is influenced by the distribution of bones, muscle and fat tissue.

Human physiology is the study of how the human body functions. This includes the mechanical, physical, bioelectrical, and biochemical functions of humans in good health, from organs to the cells of which they are composed. The human body consists of many interacting systems of organs. These interact to maintain homeostasis, keeping the body in a stable state with safe levels of substances such as sugar and oxygen in the blood.

Each system contributes to homeostasis, of itself, other systems, and the entire body. Some combined systems are referred to by joint names. For example, the nervous system and the endocrine system operate together as the neuroendocrine system. The nervous system receives information from the body, and transmits this to the brain via nerve impulses and neurotransmitters. At the same time, the endocrine system releases hormones, such as to help regulate blood pressure and volume. Together, these systems regulate the internal environment of the body, maintaining blood flow, posture, energy supply, temperature, and acid balance (pH).

Development of the human body is the process of growth to maturity. The process begins with fertilisation, where an egg released from the ovary of a female is penetrated by sperm. The egg then lodges in the uterus, where an embryo and later fetus develop until birth. Growth and development occur after birth, and include both physical and psychological development, influenced by genetic, hormonal, environmental and other factors. Development and growth continue throughout life, through childhood, adolescence, and through adulthood to old age, and are referred to as the process of aging.

Health professionals learn about the human body from illustrations, models, and demonstrations. Medical and dental students in addition gain practical experience, for example by dissection of cadavers. Human anatomy, physiology, and biochemistry are basic medical sciences, generally taught to medical students in their first year at medical school.

## Depiction

In Western societies, the contexts for depictions of the human body include information, art and pornography. Information includes both science and education, such as anatomical drawings. Any ambiguous image not easily fitting into one of these categories may be misinterpreted, leading to disputes. The most contentious disputes are between fine art and erotic images, which define the legal distinction of which images are permitted or prohibited.

## History of anatomy

In Ancient Greece, the Hippocratic Corpus described the anatomy of the skeleton and muscles. The 2nd century physician Galen of Pergamum compiled classical knowledge of anatomy into a text that was used throughout the Middle Ages. In the Renaissance, Andreas Vesalius (1514–1564) pioneered the modern study of human anatomy by dissection, writing the influential book *De humani corporis fabrica*. Anatomy advanced further with the invention of the microscope and the study of the cellular structure of tissues and organs. Modern anatomy uses techniques such as magnetic resonance imaging, computed tomography, fluoroscopy and ultrasound imaging to study the body in

unprecedented detail.

## History of physiology

The study of human physiology began with Hippocrates in Ancient Greece, around 420 BCE, and with Aristotle (384–322 BCE) who applied critical thinking and emphasis on the relationship between structure and function. Galen (c. 126 – c. 199) was the first to use experiments to probe the body's functions. The term physiology was introduced by the French physician Jean Fernel (1497–1558). In the 17th century, William Harvey (1578–1657) described the circulatory system, pioneering the combination of close observation with careful experiment. In the 19th century, physiological knowledge began to accumulate at a rapid rate with the cell theory of Matthias Schleiden and Theodor Schwann in 1838, that organisms are made up of cells. Claude Bernard (1813–1878) created the concept of the milieu interieur (internal environment), which Walter Cannon (1871–1945) later said was regulated to a steady state in homeostasis. In the 20th century, the physiologists Knut Schmidt-Nielsen and George Bartholomew extended their studies to comparative physiology and ecophysiology. Most recently, evolutionary physiology has become a distinct subdiscipline.

## Musculoskeletal system

The musculoskeletal system consists of the human skeleton (which includes bones, ligaments, tendons, joints and cartilage) and attached muscles. It gives the body basic structure and the ability for movement. In addition to their structural role, the larger bones in the body contain bone marrow, the site of production of blood cells. Also, all bones are major storage sites for calcium and phosphate. This system can be split up into the muscular system and the skeletal system.

## Nervous system

The nervous system consists of the body's neurons and glial cells, which together form the nerves, ganglia and gray matter which in turn form the brain and related structures. The brain is the organ of thought, emotion, memory, and sensory processing; it serves many aspects of communication and controls various systems and functions. The special senses consist of vision, hearing, taste, and smell. The eyes, ears, tongue, and nose gather information about the body's environment.

From a structural perspective, the nervous system is typically subdivided into two component parts: the central nervous system (CNS), composed of the brain and the spinal cord; and the peripheral nervous system (PNS), composed of the nerves and ganglia outside the brain and spinal cord. The CNS is mostly responsible for organizing motion, processing sensory information, thought, memory, cognition and other such functions. It remains a matter of some debate whether the CNS directly gives rise to consciousness.[citation needed] The peripheral nervous system (PNS) is mostly responsible for gathering information with sensory neurons and directing body movements with motor neurons.

From a functional perspective, the nervous system is again typically divided into two component parts: the somatic nervous system (SNS) and the autonomic nervous system (ANS). The SNS is involved in voluntary functions like speaking and sensory processes. The ANS is involved in involuntary processes, such as digestion and regulating blood pressure.

The nervous system is subject to many different diseases. In epilepsy, abnormal electrical activity in the brain can cause seizures. In multiple sclerosis, the immune system attacks the nerve linings, damaging the nerves' ability to transmit signals. Amyotrophic lateral sclerosis (ALS), also known as Lou Gehrig's disease, is a motor neuron disease which gradually reduces movement in patients. There are also many other diseases of the nervous system.

## Reproductive system

The primary purpose of the reproductive system is to produce new humans in the form of children and ensure their sexual development so that they can produce new humans too. It is composed of the gonads (testicles and ovaries) which produce eggs and sperm cells (gametes) and produce hormones necessary for proper sexual development. The rest of the glands and ducts of the reproductive system are responsible for the transportation and sustaining of the gametes and to nurture the offspring.

The reproductive system is first stimulated by the hypothalamus during puberty which causes the ovaries and testicles to produce testosterone (male) and estrogen and progesterone (female). Male puberty generally occurs between the ages of 13 and 15 and is characterized by beginning of sperm production and the development of secondary sex characteristics such as increased height and weight, broadened shoulders, pubic and facial hair, voice deepening and muscle

development. Female puberty generally occurs between the ages of 9 and 13 and is characterized by ovulation and menstruation. The growth of secondary sex characteristics, such as growth of pubic and underarm hair, breast, uterine and vaginal growth, widening hips and increased height and weight, also occur during the female puberty process.

The external male reproductive system is made up of the penis and the scrotum, which is a sac containing the testicles. The penis consists of the glans, and contains the urethra and urinary meatus – the point where urine exits the penis. The rest of the penis is called the shaft and contains most of the urethra. The glans is covered by a fold of skin called the foreskin, although this can be removed through circumcision.

#### Internal gross anatomy of the male reproductive system

Internally, the male reproductive system starts in the testes where hundreds of seminiferous tubules produce sperm which is then stored and matured into spermatozoon in the epididymis. They are then brought through the vas deferens which leads away from the testes to the seminal vesicles where the sperm cells are mixed with a fructose-rich fluid from the seminal vesicles allowing the sperm to stay alive and remain healthy. It is then brought by the ejaculatory duct through the prostate and bulbourethral gland, and mixed with fluids from said glands. The fluid from the prostate helps to neutralize the acidity of the vagina and keep the sperm alive. This mixture of sperm and accessory gland fluids is called semen and is released through the urethra during ejaculation. Almost the entire internal male reproductive system works in pairs with two testes, two epididymis, two vas deferens, two seminal vesicles, two ejaculatory ducts, two bulbourethral glands, but only one prostate and urethra.

The external female reproductive system, also called the vulva, consists of the mons pubis, a fatty mass that covers the pubis, the labia majora (outer lips), the labia minora (inner lips), the vaginal opening which opens into the vagina and is where the penis is inserted during sexual intercourse and children are born. The urethral opening is for the urethra that carries urine from the bladder and the clitoris which contains the most sensitive nerve endings and in humans has no use other than sexual pleasure. Located between the anus and vulva is the perineum.

Internally, the female reproductive system contains two ovaries, the uterus, two fallopian tubes and the cervix. At birth, a female has about 700,000 oocytes (the immature version of the egg cell) in both ovaries combined, although this degenerates to about 400,000 by the time puberty is reached. This is a lifetime supply, as after birth, no more oocytes are produced, compared to males where sperm cells are produced during their entire lifetime. During puberty, the menstrual cycle begins for the first time, in response to low estrogen and progesterone levels the hypothalamus releases gonadotropin releasing hormone (GnRH). This causes the anterior pituitary gland to release follicle-stimulating hormone (FSH)

and luteinizing hormone (LH). FSH stimulates ovarian follicles to grow and one dominant follicle will eventually take over.

As the ovarian follicle continues to grow, it releases more estradiol which stimulates LH secretion and suppresses FSH secretion, preventing further follicular growth. When LH levels are highest, the follicle ruptures releasing the ovum in a process called ovulation where it is then moved to one of the fallopian tubes. After ovulation, the portion of the follicle that remains in the ovary is transformed into a corpus luteum which continues to produce estrogen and high levels of progesterone. The progesterone causes the endometrium to grow thick, preparing it for implantation of a fertilized egg. If fertilization occurs, the corpus luteum continues to secrete hormones until the placenta develops enough to secrete the necessary hormones for maintaining pregnancy. Eventually, the corpus luteum will turn into a corpus albicans which is essentially scar tissue. If fertilization fails, the corpus luteum will degrade into the corpus albicans and stop secreting enough progesterone and estrogen, causing the endometrial lining to break resulting in menstruation.

Many diseases affect the reproductive system such as polycystic ovary syndrome (PCOS) which is characterized by elevated androgen levels, menstrual irregularities and/or small cysts on one or both of the ovaries. It is a common disease affecting at least 7% of adult women. Symptoms may include excess body hair, infertility, or weight gain, male pattern baldness.

Another reproductive disease is testicular torsion, it occurs when the spermatic cord which holds up the testicle wraps around itself cutting off blood flow to the testicle. Testicular torsion is a medical emergency and can result in testicular death or infertility if not treated immediately by physically unwrapping the spermatic cord. If the testicle has suffered severe damage, it may need to be surgically removed in a lateral orchiectomy. The primary symptom of testicular torsion is severe testicular pain at rest, nausea and vomiting may also occur. Testicular torsion can occur at any age, although it is most common in 12-18 year olds.

Sexually transmitted infections such as syphilis, HIV, chlamydia, HPV and genital warts are spread through sexual intercourse, including oral, vaginal, anal, and manual sex. Many of these infections can be lethal if left untreated though others are mostly harmless.

Cancer can affect many parts of the reproductive system including the penis, testicles, prostate, ovaries, cervix, fallopian, uterus and vulva.

### Molecular structure of the human body

The human body is the entire structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organs and then organ systems. They ensure homeostasis and the viability of the human body

It comprises of head, hair, neck, torso (which includes the thorax and abdomen), arms and hands, legs and feet.

The study of the human body includes anatomy, physiology, histology and embryology. The body varies anatomically in known ways. Physiology focuses on the systems and organs of the human body and their functions. Many systems and mechanisms interact in order to maintain homeostasis, with safe levels of substances such as sugar and oxygen in the blood.

The body is studied by health professionals, physiologists, anatomists, and artists to assist them in their work.

The human body is composed of elements including hydrogen, oxygen, carbon, calcium and phosphorus. These elements reside in trillions of cells and non-cellular components of the body.

The adult male body is about 60% water for a total water content of some 42 litres (9.2 imp gal; 11 US gal). This is made up of about 19 litres (4.2 imp gal; 5.0 US gal) of extracellular fluid including about 3.2 litres (0.70 imp gal; 0.85 US gal) of blood plasma and about 8.4 litres (1.8 imp gal; 2.2 US gal) of interstitial fluid, and about 23 litres (5.1 imp gal; 6.1 US gal) of fluid inside cells. The content, acidity and composition of the water inside and outside cells is carefully maintained. The main

electrolytes in body water outside cells are sodium and chloride, whereas within cells it is potassium and other phosphates.

## Cells

The body contains trillions of cells, the fundamental unit of life. At maturity, there are roughly 30-37 trillion cells in the body, an estimate arrived at by totaling the cell numbers of all the organs of the body and cell types. The body is also host to about the same number of non-human cells as well as multicellular organisms which reside in the gastrointestinal tract and on the skin. Not all parts of the body are made from cells. Cells sit in an extracellular matrix that consists of proteins such as collagen, surrounded by extracellular fluids. Of the 70 kg (150 lb) weight of an average human body, nearly 25 kg (55 lb) is non-human cells or non-cellular material such as bone and connective tissue.

## Genome

Cells in the body function because of DNA. DNA sits within the nucleus of a cell. Here, parts of DNA are copied and sent to the body of the cell via RNA. The RNA is then used to create proteins which form the basis for cells, their activity, and their products. Proteins dictate cell function and gene expression, a cell is able to self-regulate by the amount of proteins produced. However, not all cells have DNA; some cells such as mature red blood cells lose their nucleus as they mature.

## Tissues

The body consists of many different types of tissue, defined as cells that act with a specialised function. The study of tissues is called histology and is often done with a microscope. The body consists of four main types of tissues. These are lining cells (epithelia), connective tissue, nerve tissue and muscle tissue.

Cells that lie on surfaces exposed to the outside world or gastrointestinal tract (epithelia) or internal cavities (endothelium) come in numerous shapes and forms – from single layers of flat cells, to cells with small beating hair-like cilia in the lungs, to column-like cells that line the stomach. Endothelial cells are cells that line internal cavities including blood vessels and glands. Lining cells regulate what can and can not pass through them, protect internal structures, and function as sensory surfaces.

## Organs

Organs, structured collections of cells with a specific function, mostly sit within the body, with the exception of skin. Examples include the heart, lungs and liver. Many organs reside within cavities within the body. These cavities include the abdomen (which contains the stomach, for example) and pleura, which contains the lungs.

## Heart

The heart is an organ located in the thoracic cavity between the lungs and slightly to the left. It is surrounded by the pericardium which holds it in place in the mediastinum and serves to protect it from blunt trauma, infection and help lubricate the movement of the heart via pericardial fluid. The heart works by pumping blood around the body allowing oxygen, nutrients, waste, hormones and white blood cells to be transported.

The heart is composed of two atria and two ventricles. The primary purpose of the atria is to allow uninterrupted venous blood flow to the heart during ventricular systole. This allows enough blood to get into the ventricles during atrial systole. Consequently, the atria allows a cardiac output roughly 75% greater than would be possible without them. The purpose of the ventricles is to pump blood to the lungs through the right ventricle and to the rest of the body through the left ventricle.

The heart has an electrical conduction system to control the contraction and relaxation of the muscles. It starts in the sinoatrial node traveling through the atria causing them to pump blood into the ventricles. It then travels to the atrioventricular node which makes the signal slow down slightly allowing the ventricles to fill with blood before pumping it out and starting the cycle over again.

Coronary artery disease is the leading cause of death worldwide, making up 16% of all deaths. It is caused by the buildup of plaque in the coronary arteries supplying the heart, eventually the arteries may become so narrow that not enough blood is able to reach the myocardium, a condition known as myocardial infarction or heart attack, this can cause heart failure or cardiac arrest and eventually death. Risk factors for coronary artery disease include obesity, smoking, high cholesterol, high blood pressure, lack of exercise and diabetes. Cancer can affect the heart, though it is exceedingly rare and has usually metastasized from another part of the body such as the lungs or breasts. This is because the heart cells quickly stop dividing and all growth occurs through size increase rather than cell division.

## Gallbladder

The gallbladder is a hollow pear shaped organ located posterior to the inferior middle part of the right lobe of the liver. It is variable in shape and size. It stores bile before it is released into the small intestine via the common bile duct to help with digestion of fats. It receives bile from the liver via the cystic duct which connects to the common hepatic duct to form the common bile duct.

The gallbladder gets its blood supply from the cystic artery which in most people emerges from the right hepatic artery.

Gallstones is a common disease in which one or more stones form in the gallbladder or biliary tract. Most people are asymptomatic but if a stone blocks the biliary tract it causes a gallbladder attack, symptoms may include sudden pain in the upper right abdomen and or center of the abdomen. Nausea and vomiting may also occur. Typical treatment is removal of the gallbladder through a procedure called a cholecystectomy. Having gallstones is a risk factor for gallbladder cancer which although quite uncommon is rapidly fatal if not diagnosed early.

## Systems

### Circulatory system

The circulatory system consists of the heart and blood vessels (arteries, veins and capillaries). The heart propels the circulation of the blood, which serves as a "transportation system" to transfer oxygen, fuel, nutrients, waste products, immune cells and signalling molecules (i.e. hormones) from one part of the body to another. Paths of blood circulation within the human body can be divided into two circuits: the pulmonary circuit, which pumps blood to the lungs to receive oxygen and leave carbon dioxide, and the systemic circuit, which carries blood from the heart off to the rest of the body. The blood consists of fluid that carries cells in the circulation, including some that move from tissue to blood vessels and back, as well as the spleen and bone marrow.

### Digestive system

The digestive system consists of the mouth including the tongue and teeth, esophagus, stomach, (gastrointestinal tract, small and large intestines, and rectum), as well as the liver, pancreas, gallbladder, and salivary glands. It converts food into small, nutritional, non-toxic molecules for distribution and absorption into the body. These molecules take the form of proteins (which are broken down into amino acids), fats, vitamins and minerals (the last of which are mainly ionic rather than molecular). After being swallowed, food moves through the gastrointestinal tract by means of peristalsis: the systematic expansion and contraction of muscles to push food from one area to the next.

Digestion begins in the mouth, which chews food into smaller pieces for easier digestion. Then it is swallowed, and moves through the esophagus to the stomach. In the stomach, food is mixed with gastric acids to allow the extraction of nutrients. What is left is called chyme; this then moves into the small intestine, which absorbs the nutrients and water from the chyme. What remains passes on to the large intestine, where it is dried to form feces; these are then stored in the rectum until they are expelled through the anus.

### Endocrine system

The endocrine system consists of the principal endocrine glands: the pituitary, thyroid, adrenals, pancreas, parathyroids, and gonads, but nearly all organs and tissues produce specific endocrine hormones as well. The endocrine hormones serve as signals from one body system to another regarding an enormous array of conditions, and resulting in variety of changes of function.

#### Immune system

The immune system consists of the white blood cells, the thymus, lymph nodes and lymph channels, which are also part of the lymphatic system. The immune system provides a mechanism for the body to distinguish its own cells and tissues from outside cells and substances and to neutralize or destroy the latter by using specialized proteins such as antibodies, cytokines, and toll-like receptors, among many others.

#### Integumentary system

The integumentary system consists of the covering of the body (the skin), including hair and nails as well as other functionally important structures such as the sweat glands and sebaceous glands. The skin provides containment, structure, and protection for other organs, and serves as a major sensory interface with the outside world.

#### Lymphatic system

The lymphatic system extracts, transports and metabolizes lymph, the fluid found in between cells. The lymphatic system is similar to the circulatory system in terms of both its structure and its most basic function, to carry a body fluid.

Sydney Nicola Bennett born 1985. Canada

American - Canadian

Hollywood Multi - Billionaire A-list Actor - Artist

Another form of physics engineered for my retirement transition

In retirement from neurological sciences & technology while doubling in intelligence between earning an education, industry spec credentials & through developing knowledge, skill & ability I had developed an advanced approach in a cross career while focusing on a social, financial & investment portfolio

So that said... as it was & is I will focus on my continual mockery of those involved in what I consider mistakes in research versus standards which I had assisted in creating & implementing on a global scale

My focus will solely be on making films, music, art & a screened social circle then my DNA children & specifics in my family

In terms of this mockery response on a global scale my underground works in research with others will be brought to the surface like a hypnotizing act of not houdini but to split & remind those involved & connected that my skill sets me apart equal to few rather than many

In America they refer to the level in film as their A-list for the mainstream yet there are multiple areas interconnected of interest to myself in mixing art, sciences, technology & current, forecasted & past events in our earth's history

Retiring as a Multi - Billionaire A-list Actor from once suppressed research in sunny California connected to different international interests while consciously voiding conflict out of respect for all borders & airspace of 195 countries & my almost 196 in a time when I had tried

H.I.3 CASE - SIMPLE DESCRIPTION

All citizens are at risk similar to Covid 19 requiring vaccinations administered by the NHS - UN global standard then

M.S.P-M.C.G Murder City - Security

Your brain has to be connected to a safe wireless device to monitor your body & track your whereabouts 24/7 leaving you still in control of your body with privacy while only your legal representation & a health board of screened approved professionals can see the device with or without you under legal contract approval

Threat levels 0-1 are unmanned monitored

Threat levels 2 are monitored as persons of interest

Threat levels 3-4 are monitored & controlled by different teams & software intervention

All non-approved non-standardized labs will not be able to operate as they will be traced & investigated for every citizen's safety, privacy & rights

PURPOSE - DOMESTIC & FOREIGN THREATS

This is so a foreign threat country or group within their countries or our own operating in secret cannot connect your body to a device to take control of your body locking in your conscious mind so you are a prisoner inside your body allowing them wireless control of your muscles & entire body so they can send their voice through mouth for you & speak into your skull & ears

The human body can be connected to one-six of these devices allowing multiple labs to monitor you 24/7 & even take vocal, physical & psychological - mental control of your body

This is all I, Dr Nic Bennett - Sydney Nicola Bennett can do to protect the lives of the majority of most populations on planet earth using my investment group & connected Royal - Elite security defence program with advanced neurological sciences & technology with connected advanced programs

It's like an adult from terrible twos. Off the suck tities & onto the clam chowder then adult suck tities then trade out, up, down & around then back into another or single

## TURNING BOOKS INTO MOTION

Sydney Nicola Bennett born 1985. Canada

American - Canadian

Hollywood Multi - Billionaire A-list Actor - Artist

Another form of physics engineered for my retirement transition

In retirement from neurological sciences & technology while doubling in intelligence between earning an education, industry spec credentials & through developing knowledge, skill & ability I had developed an advanced approach in a cross career while focusing on a social, financial & investment portfolio

So that said... as it was & is I will focus on my continual mockery of those involved in what I consider mistakes in research versus standards which I had assisted in creating & implementing on a global scale

My focus will solely be on making films, music, art & a screened social circle then my DNA children & specifics in my family

In terms of this mockery response on a global scale my underground works in research with others will be brought to the surface like a hypnotizing act of not houdini but to split & remind those involved & connected that my skill sets me apart equal to few rather than many

In America they refer to the level in film as their A-list for the mainstream yet there are multiple areas interconnected of interest to myself in mixing art, sciences, technology & current, forecasted & past events in our earth's history

Retiring as a Multi - Billionaire A-list Actor from once suppressed research in sunny California connected to different international interests while consciously voiding conflict out of respect for all borders & airspace of 195 countries & my almost 196 in a time when I had tried

An unmanned crated research skilled Actor, Artist with a vast variety of focus looking to remain alive past 110 effectively

The pandoras boxes will be stored safely housing my memories in 10 terabyte harddrives

Body language

Facial expression

Limb, hand, finger, feet, toe gestures

## PRIVATE LIFE - STYLES

Interest & influence based alterations applied annually based on daily schedules of interest amongst different people sharing similarities & differences appropriately

## PROFESSIONAL LIFE - STYLES

Interest & influence based alterations applied annually based on daily schedules of interest amongst different people sharing similarities & differences appropriately

## PROCESSING THE DEVIDE

Self-counsel or professional counsel to devide the two so they do not overlap as that can be unhealthy for different relationships then image, character, credibility & reputation

Safety, well being then rights, privacy, health, earned basic needs & earned privilege including financial balancing aspects to maintain a life overall

## DEVELOPED HABITS - ROUTINE

Breaking habits & routine

Re-establishing after personal self-audits

Personal judgement then others outside & scenarios including embarrassment & humiliation

## HUNDREDS OF MONEY TREES INTERTWINE

Finding ways to earn then have that in which you earned each while your continue earning using a tree concept

Your earn

You set up three or more earning options that earn from that in which you earned

Now you have four revenue streams to maintain strategically which can then slowly develop & branch out into others in a controlled balancing act

You continue earning separately then adding a percentage

A money tree within the Babylon concept

## FOCUS

What you focus on then a day, week, month, quarterly, semi-annual & annual plan of different interconnected intertwined goals to slowly work at between daily tasks in a professional - private life balance with capitalist budgetary constraints to also meet financial goals

Tasks daily

Activity specific clothing, accessories, footwear & purpose, function, how, why, history of, color pallets & message it sends then body language use in wearing

Age appropriate behaviours & manipulation of to control internal feeling then expressive communication ability while understanding how multiple groups may interpret or misinterpret the message as your audience in communicating, reacting & responding

People noticing you & the golden rule of glance versus staring as it's rude & look away, look down or in the background horizon point unlike one on one, communicating to a small, medium & large group

Silent or silent - physical communication versus vocal - physical then audiences directly engaged or indirect & communicating indirectly with people versus direct

Indirect involves voiding attention to connect with those your staged with in secret so others a potential 0, 1, 2, 4 or fluctuating threat or accusing saboteur of sorts cannot detect your connected like a buddy system of fours & more to report so you don't go missing as different persons & groups could kidnap you do different purpose directly or through efforts using wireless technology

Man made or natural disaster & hazards

CONCLUSION

Basic - Mid Level - Advanced understanding especially of body language in silent or vocal communication variations

NEURO-TECH CRIMINAL CASE

H.I.3 Case [cypressmotors.blogspot.com](http://cypressmotors.blogspot.com)

Havana International 3+

Efforts taken against Dr Nic Bennett on record between 2012-2024 & prior dating back before 1999

## WIRELESS GOVERNANCE

Past-present 24 hour rotational teams with volunteers & guests flown in & driven in

Stakeholders

Supervisor

Operating Handlers

Persons & groups connected, contacted then those connected operating through different offline, online, mobile & telephone channels of communication

## CONTROL FREAK COLLECTIVES

That's what you do. Control freak collectives demanding we change how we think, imagine or remember & how we perform all tasks in our private lives or professional lives from how we do & how we learned then developed & do it the way the incredibly abusive insane psychopaths & sociopaths involved expect us to

People singing, rhyming & rapping through our heads. Into the skull - ears & through the mouth to suppress us psychologically - mentally from natural psychological - mental process in thinking, imagining or remembering while people around the body can overhear these efforts

Expecting to control & change how we use a toilet & our own genitals, rect\*m & an\*s while urinat\*ng or monitored passing stool (taking a sh\*t)

People attempting to control where I look taking control of my eye muscles, eyesight focus & tell me how to use my own d\*ck when urinating based on how they & others do since 2012 when I already knew how & developed a way since ages 1-2 after my 1985 birth

These same people expecting to mock & immaturely make fun of me while I am urinat\*ng or passing stool & take control of my body causing pain, repetitive temporary injuries head to toe & while I am urinating using different rotating teams & thousands of detention or execution & a combination of techniques rather normal or normal unmanned illegally monitored

Everything the rotations did, said & all internal conversations daily at the one Ontario neurological technology lab clusters along with accomplices connected & those operating outside the responsible locations is documented & recorded while all offline, online, telephone & mobile channels of communication is documented

THAT'S WHAT YOU DO

These collective interests that expect to spy on us wirelessly & through use of different people in our private & professional lives can expect to take control of our bodies 24/7 & control our physical bodies & how we do everything with whoever they bring in & contact regardless of where we are & what we are doing or intending

## BASIC CAPABILITIES - NEURO-TECH

Frequency - Electromagnetic - Pulse - Acoustic

Permanent or detachable full body drone robot puppet ventriloquist doll technology devices attached to the biological body of human, animal, mammal & insects

Wireless signals attached to the brains physical pineal gland using specific hertz to connect & maintain connection

Electrical signals sent through the body to take control of all muscles & internal organs function from partially to almost fully or not at all

The eyesight & hearing is unlocked allowing for monitoring of

All thought, imagination & memory is unlocked & can be extracted

Consciousness is locked in when the physical is taken over using wireless electrical signals to control the physical

## FURTHER CAPABILITIES

Once the wireless signal connects to the physical brains pineal gland an imprint of the physical body shows up within the full body device & on the screen so you can monitor & wear the subject body like an avatar suit to take partial to full vocal, physical & psychological control

You can monitor all senses & mental state: thought, imagination & memory

At this point locking in the consciousness allows you as a person or with multiple to control muscles, internal organs & ability to speak by disability vocals to send your voice through their mouth & even into their skull & ears to control the body wirelessly

Advancements left automated systems connected with cameras pointed at so people can just log in & control the body using mechanical to digital systems rather than a human team while there is software associated with then heads up display capabilities & software the conscious subject candidate can control themselves for different efforts if allowed to creating ability for them to multi-task psychologically-mentally & physically naturally then between controlling the software separately simultaneously

Some devices have a permanent attachment signal that cannot be turned down in Hz hertz to detach from the body while detachable equipment can attach & detach with a click of a button yet you can reattach the body

Conscious mind synapses sent through the physical body via the brain

Neuro-tech intervention sharing the body or locking in the conscious mind to take control sending wireless signal controlled synapses through the brain to the physical body

SYDNEY SYDNEY

A new public investment. Dr Nic Bennett as Sydney Sydney Sunshine

Omg ladies. Fu\*k my d\*ck. Look at this

Since dropping interest in the Lola Sphere development in digital - physical form then rebranded Sydney Bennett brands & actual then Art by Dr Nic Bennett yet a percentage returns coming at ones bank accounts effectively along with CIG SB - RBK Seven

Now with investments sorted & more free time. I can focus on a permanent H.I.3 case resolution to settle & unman to use neurological sciences - technologies crated for only controlled environments including entertainment if at all rather than uncontrolled & no standards, policies & practices

I was forced into full retirement during efforts to restructure between 2022-2024 yet I am coming out of retirement to focus on lifting past underground digital - physical unit & service output plans using my skill & the H.I.3 case of projects shelved by outside intervention which had no right

Communication using ones body & packaged financial returns

Sing + Band

Write + Act + Direct

Draw + Paint + Construct

Paints the picture or constructs the item. Creation fee & marketplace cost then retail fee. Double profit margin & all stakeholders are Golden. Any one complains that I am not good in bad ways we will use the one Ontario neurological technology lab cluster locations mistakes on record in research where standards left a standardized lab as threat in disregard for rights & sound practice

Professionalism in the professional & private life

I draw the picture. You know. 250-900 million people but the picture

I walk on & enjoy life. Just add thousand of products & we do not even require main stream media influence which would just drive numbers into the billions on average despite trends in multiple international markets

Now ladies.... Remember the dance & muscle - body control in a secrecy

Up & down. Down & up. Tighten. Loosen

Rinse repeat. Now really focus on your camel toe area. Tighten & loosen as it's part of your livelihood as a control tool when your catering as a sly alpha - sub beta to keep your partner interested

It is well known you don't cuss out a Private Sector, Underground or Underworld Group Leader

You can however cuss at the World Leaders & threat labs or oneself

Especially if someone does it on your behalf & you want to mock their effort in destroying your image, character, credibility & reputation putting your safety & well being

The Shock - The Shock

DISTRIBUTION CHANNELS

Digital - Physical in my hustle based on my followers - fans & interests connected to investments

A lot of people do well in different careers with an education. Salary or hourly plus bonus & incentives based on performance then retirement, benefits. The whole package while some add investments

Some people as a group - people do well in larger returns on contract projects & royalties or lower to higher risk investments

I, Dr Nic Bennett - Sydney Nicola Bennett am able to run a \$10 return on 250 million or over 900 million so were talking my cut of US \$2.5-9 Billion dollars with just one project

Some people have it. You know. That's how life is

HEADS LIKE AT A VENUE

Average Market

Digital - Physical Units & or Services sold with active average market numbers of 2.5-3 Billion customers in the accessible global market through multiple connecting channels internationally

Advanced Market

Digital - Physical Units & or Services sold with active average market numbers of 3-6 Billion customers in the accessible global market through multiple connecting channels internationally

1-2 billion are not accessible due to conflict & limitations in accessing markets within borders & airspace then import-export constraints

1.5 billion from average - advanced markets are connected to the H.I.3 case creating limitations with 25 million + yet under 1.5 billion at an average under 100 million

Average Percentages

30% 4.8 Billion = 1.4 Billion heads Asian Market

30% 47 Million = 14 Million heads Oceania market

30% 1.5 Billion = 450 Million heads African Market

75% 340 Million = 255 Million heads American market

75% 40 Million = 30 Million heads Canadian market

30% 445 Million = 133.5 Million heads South American market

75% 740 Million = 555 Million heads European market

Comedy, laughter, safety, health, baseball all important background interests as I like to laugh a lot & while considerate of my life cycle of experiences then others I am also very strict, demanding & straight forward in my daily schedule, quarterly goals & efforts

SEVEN

Take control of a humans ability to control their body & earn or access education, research materials & or to access basic averages in life to function & maintain there life alone, as a couple, family & even with children then your in a situation

You negatively affect an adult man or woman's ability to provide for themselves financially through earned employment to meet basic needs & enjoy an earned privilege

You risk legal & private action including positive injury & or death directly or through efforts of a ghost drafted group

If you operate as a controlling group it is no different in retaliation

DISAPPEARANCES OCCUR OFTEN

Domestic disputes, companies, brands & business related

Killings occur when equal opportunities & law, rights & practice are brought to the surface in advanced internal - external ghost audits which go against legal rights

Preference on shareholders - owners & family then qualified interests in diversity second makes sense to a percentage of 25% for a workforce yet 50-75% should be diverse equal opportunities regardless of race, culture, age, gender, sexuality, gender expression while fluctuations in social & economic status are less important yet education level, knowledge, skill, ability & style then capability to learn & adapt is of importance

Public image is important as is private

Interests held under non-disclosures & gag orders within domestic & international law

Canada now has dead zones of repetitive counter attacks over the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven prior to 1999 & post (after) daily within the borders & airspace of Canada

You were burned down once since 2012-2024 negotiations began to unman & settle

You will be burned down repeatedly annually for the next century

Hundreds of areas in Canada are counter attack zones versus others that are trusted & preserved just like boycotted companies, brands & businesses versus black listed persons & groups, singles, couples or & families then those trusted

Separate persons of interest are on our radar monitored through a Canadian connected M.S.P-M.C.G group connected to a larger international grid within & connected to different areas of Government & Private Sectors

YOU DON'T LIKE BEING DESCRIBED?

You are described because the people operating at & with the one Ontario neurological technology lab cluster locations

We will be positively burning the Okanagan Valley into the ground annually until all infrastructure & structures on all private properties are slowly destroyed

Modern Greek gods of the Bevarian Sect connecting in over 60 countries have advanced modern military industrial grade technologies

Floods, wrath, financial control schemes, earthquakes & multiple concerns versus natural in aiding controlled events to counter others for a larger effect often using as a retaliation distraction if you will

Assumptions offer a cover we never asked for while a larger elitist war has been going on over neurological technology & modern wireless enslavement since prior to 1999

Why I, Dr Nic Bennett hated a lot of fu\*king people growing up

BRADLEY CLINTON MOORE - FU\*KING LOSER

Mr Tyler Moore. Bradley. Jerk off Brad the d\*ckhead a once childhood sidekick douche after a birthday party at like age 4

A jerk off swinger butt turd bisexual odd ball marines to a swinging chunk lesbian

Up the sandwich tube of sewage with Bradder

The biggest loser fu\*king loser bitchy kid I was forced to spend time around as a child & teenager was Brad Clinton Moore

This fu\*king sabateur loser was involved operating with those operating at & at the one Ontario neurological technology lab clusters

He tried getting in with Ethanol Trickey & Troy Pacaud (Pac-Oh) along with Darcy Black

See I was not there friend. I had a separate social circle & did not appreciate being forced to go to Cheapskates & or Legit Trix or Momentum in North Bay in Ontario Canada between the 1990's-2024

One piece of sh\*t that operated at & with the one Ontario neurological technology lab cluster included these same people prior to 2012 & daily between 2012-2024

I personally did not appreciate being forced to spend any money at any North Bay business between 1997-2024 & prior to that I wanted to consider out of area or mail order options

I did not appreciate the one Ontario neurological technology lab or those operating at or with

We have our own separate lives & yet they are described in the H.I.3 case based on multiple reasons including those operating at & with the one Ontario lab

A turd day featuring another day in the Bradder hood. Skrilla short & hard times "Holmes" (we don't know if the string beaner is hooked up to a mind device but someone extracted his memories)

Moore Heads  
Rod Head  
Nic Head  
Bennett Heads

Lists of heads hooked up to one-six devices & memories extracted across Canada by different labs is in the hundreds of thousands including those since deceased

I went to Brad arses stag for his wedding while travelling through from Ottawa to Kelowna in like 2011 after the piece of sh\*t tried hitting on & hooking up with most women I dated in the past even if he already had someone... a superiority man of piece of sh\*t to your face & behind your back

He did not appreciate big exposed so we exposed the peice of sh\*t to everyone in over 60 countries because fu\*k you ass\*le

Life's throwing Bradley a curve ball 24/7. Karma is a fu\*king d\*ck (what a fu\*king goof)

MADDY BENNETT

Madison Rebecca Koslov-Sumner (Bennett) born 2004 & the group with siblings are my protege predecessor so if I am deceased they have the H.I.3 case & all M.S.P-M.C.G Murder City grids mapped of everyone's history so they cannot act again as they had in the past

Maddy & sisters (older) with brother (younger) & children operating with Patrick & Nikki's children alongside new siblings & specific take over CIG SB - RBK Seven between 2030-2035 while parents retire & focus on retirement interests & projects

MY MOTIVATION

SECTION 1

Fu\*king losers

The people I thought were lesser with few exceptions

Fake friends - sabateur's - haters

People not my friend as my conscious choice

People connected - slim pickings of stupid

I am fake to their face. A shiney plastic upbeat smiles of in your face just lit up like a fu\*king Christmas tree smiles & everything

Just loves you. Yeah. So happy (thinks: fu\*king hate these fu\*king ass\*lees)

Black listed & persons of interest

## SECTION 2

My social circles I trusted separately despite a diverse list of fu\*king losers in the mix at times (sarcasm & reality)

The people I screened & was okay with

Genuine friends

Trusted persons

## SECTION 3

Boycotted companies, brands & businesses

Trusted ones of companies, brands & businesses

## THE CONCLUDE THE CONCLUDE

I don't judge

2012-2024 RESTRICTED RIGHTS

After separate efforts taken back prior to 1999 & post after up until 2011

Restrict restrictions & groups banding together for total control regardless of where Dr Nic Bennett - Sydney Nicola Bennett is or was & is or as to what one may be doing or intending with harsh control & monitoring efforts administered 24/7

Efforts to seize banking accounts, personal & company, brand or business

then investment accounts & to hold down using full body wireless neurological technology equipment from the one Ontario neurological technology lab clusters with those involved & connected expecting Dr Nic Bennett - Sydney Nicola Bennett under their watch & control isolated, discredited & held down drained of energy in pain at the bottom socially, economically - financially with very little in terms of assets unwelcome to think, imagine or remember clearly & to enjoy privacy then vocal, physical & psychological - mental control of one's body & no right to work earning a living with restricted private life socially & in terms of activities & daily schedules including personal hygiene, diet, medical & dental options with restricted basic needs & no right to an earned privilege while any children are taken away & no adult dating or Sexual relations or thought of welcomed 24/7 with strict aggressive detention practices involved

Dr Nic Bennett - Sydney Nicola Bennett found ways & groups to work around these harsh efforts but not without sustaining pain & repetitive injuries & permanent healing incorrectly

Advice from Dr Nic Bennett

Ignore critics including those that just met you in a professional or private setting

Focus & allow skill & performance to speak for itself as you never stop developing, restructuring & refining over time to improve

Your body & life cycle with similarities & differences to others as your the consciousness behind the eyes born into your body not theirs

Opponents are irrelevant in the adventure that is the journey that is your life

You may have to work with in a team or independently from alongside or separately

**ENSURE YOUR PLACE**

Are you in a role in your professional or private life to offer inspired suggestive constructive direction & guidance as an additive to one person's life cycle of experience, knowledge, skill & daily tasks at any given term period as a supervising manager or are you an outsider

intervening?

Do you have the right legally & assumed privately to & does the receiver what or seek out such to better their lives or are you a saboteur & or illegal actor - controller hybrid looking to oversee based on different motivations including a superiority complex to feed desuised under a tool of envy which does not exist

What is your motivation & place?

Private life - On your own terms

If one or more person expects a person to change how they think, imagine or remember & act vocally, physically & psychologically - mentally

What is the motivation? Should or could you & is it your place to? Legally or privately?

If one or more person expects a person to change how they are physically then their choice in activity specific clothing, accessories & footwear or & interests in their private life

What is the motivation? Should or could you & is it your place to? Legally or privately?

This change & manipulative coaxed control effort allows the overpowering aloha - beta hybrid submissive suggestion effort to control through forced influence & demand with different techniques & tactics taken by the one person & others connecting in the persons professional & private lives including those complaining & manipulating for control over a person, company, brand & business

Is it your place to monitor & or monitor & control a person wireless with or court or health board order then dire or through other people in their private or professional lives?

Law & rights are. This is not allowed & legs with private consequences exist as a result

Age appropriate 0-17, 18-100+

Temporary intervention for someone in temporary dismay or experiencing a natural or man-made hazard or potential & or disaster could include a report or comment to otherwise it is your place

A silent report if the person is in danger & you could be caught in the cross fire to protect all parties including yourself even if it is a legal or criminal scam - con staged effort as layered cover of distractions to accomplish for social or financial gain or sabotage

## PERSONAL OPINION

My discretion as a responsible educated informed adult capable of research & ability to learn, adapt & support myself & dependants daily using my conscious opinion & due diligence between ages 16-18, 18-25+ & still now at age 38 with expectations to maintain a safe financially sustained life between ages 38-100+ now in 2024 including my 30th birthday on September 1

My right to privacy & control over my own body 24/7 every waking & sleeping moment in my adult life daily between 2012-2024 & prior to dating back before 1999

## KNOCKING US OFF THE INTERNET

The people that wanted to revoke the CIG SB - RBK Seven & three Bennett's Rod, Marie & Jordan Libel - Savage - Stragrat - Bennett then Dr Nic Bennett of the CIG SB - RBK Seven including those in any one Government & Private Sector in any of 195 countries can describe as to why they feel they have the legal right to revoke the CIG SB - RBK Seven & three Bennett's of their legal rights, rights as adults, right to privacy right to control their own bodies for themselves vocally, physically & psychologically - mentally

Those responsible as a collective banding together believe it is their planet & every human being that had & does live or may is theirs & all material items - assets & everything that had & does exist or that may is theirs on their planet

These responsible interests do not have legal right to override laws & rights of any one person with no court order & or health board as those

that operated at or with the one Ontario neurological technology labcluster operating prior to 1999 & post (after) had decided

We, the CIG SB - RBK Seven including the Bennett brothers Jordan & Nic do not want to be told that assumptions, accusations & criminal or fraudulent liability held by others outside the group & brothers life cycle of experiences gives right to one or more groups to void the legal rights of & right to access Internet for legal activities on a professional, research & private level

There is no just cause - due cause or accurate allegation with presentable fact including conscious versus dictated decisions on record documented prior to 1999 or post (after) justifying such actions taken against the CIG SB - RBK Seven including the Bennett brothers Jordan & Nic in terms of legal right, right to use the Internet for any legal purpose & or to use any legal device to access the Internet in any countries borders & airspace allowing the interests in with a Passport or Citizenship

The interests involved & connected to the one Ontario neurological technology lab clusters operating then separately operating group interests have no legal right to intervene in the private or professional lives of the CIG SB - RBK Seven including the Bennett brothers Jordan & Nic directly, through other people or groups & or through wireless neurological technology

This includes dictated choice in social circles, interests, assets, education, thought, imagination or memory access then physical bodily control then activity specific clothing, accessories & footwear daily administered by ones conscious self

Firmly strict & at ease

No probable cause. No search warrant. No reason to believe accessible. No election of statue of limitation right in a hybrid cold case within boundaries of international connecting law to disregard past events dating before 6 months to 2 years or over 10-25 years on a 24 hour basis in recollection using documented & recorded fact with available documented proven valid traced offline, online, mobile & telephone channels in correspondence

## LEGAL CREDENTIALS AS A SIDE GIG

If I, Dr Nic Bennett write my Medical Practice Examination & obtain credentials to operate as an Attorney in the State of California or Federally bin USA with international expressed interest I could do more than assist in a legal case as an expert by using my knowledge & poetic natural improve approach to reiterating crafted legal communication & suggestion alone in an unbiased way then in counter arguemnetive debates in favor of the innocent party regardless as to whom I am representing being a person, group, company, brand or business while also adding unbiased connecting expert opinions then thousands of international cade reference in finding a suggestive legal remedy alongside a jury & court forum in private & public cases administering which is considered a legal situation that could otherwise be disregarded through private intimidation or financial containt in concern

## SABATEURS - BANDING TOGETHER

Criminal - Illegal - Fraudulent action taken against & if we respond privately or legally in private or publicly those involved directly, others connected then specific persons they expect to contact & others connected within Canada & USA expect to take negative actions against to sabotage our image, character, credibility & reputation in our professional & private lives as one person, connected groups then companies, brands & businesses we worked at or invest in & or own

Power in number control groups banding together as thug groups expecting all laws domestically & internationally do not apply to them because of who they are & who they can connect with

Efforts in expectation to isolate, discriminate, disrespect & waist the time of tormenting & rewriting history creating belief & having others hold you or those connected to belief for total control of your professional & private lives

We will take action against these operating grape vines of control in our lives which expect to intervene as illegally operating public & private interests above probing a penetration effort to take control, dismantle or coax & manipulate from the outside in while using those connecting from the inside out taking control of those in charge legally by name & legal right

Libel. Defamation, slander, hearsay & cause from effect as result negatively affecting the rights, safety, image, character, credibility & reputation of a person, group, company, brand or business in effort which puts people's safety & well being at risk of negative effects, injury or death by one or more offline, online, mobile & telephone channel in attack or counter control effort to overpower, shut down, disrespect & walk from while those responsible act like they don't know or they administer use of one or more scape goat fall persons if they do not use their target prey as the scape goat which allegedly brought it upon themselves by those targeting

Offline & online cyber adult bullying using different efforts is in the mix with psychological - mental torment to exhaust resource, waist time, torment & injure while draining energy to revoke ability to do anything daily sabotaging all conscious efforts illegally & criminally operating directly using basic, mid level & advanced efforts

Often collective diverse legal abiding, reformed & criminal persons with groups connecting creating a word smith crafted web of effort while operating as a double edged sword by design manufacturing efforts while administering layered motives as a collective & connecting modus operandi to oversee, overpower & control one or more targets in their professional & private lives with no legal right

American - Canada

Hollywood Multi - Billionaire A-list Actor - Artist

Another form of physics engineered for my retirement transition

In retirement from neurological sciences & technology while doubling in intelligence between earning an education, industry spec credentials & through developing knowledge, skill & ability I had developed an advanced approach in a cross career while focusing on a social, financial & investment portfolio

So that said... as it was & is I will focus on my continual mockery of those involved in what I consider mistakes in research versus standards which I had assisted in creating & implementing on a global scale

My focus will solely be on making films, music, art & a screened social circle then my DNA children & specifics in my family

In terms of this mockery response on a global scale my underground works in research with others will be brought to the surface like a hypnotizing act of not houdini but to split & remind those involved & connected that my skill sets me apart equal to few rather than many

In America they refer to the level in film as their A-list for the mainstream yet there are multiple areas interconnected of interest to myself in mixing art, sciences, technology & current, forecasted & past events in our earth's history

Naturalization (or naturalisation) is **the legal act or process by which a non-national of a country acquires the nationality of that country after birth**

Potential - Tax Haven of others in Citizenship

I have always questioned if Robert Deniro had operated Christopher Walken with others directing him directly on-set or using full body neurological technology equipment in research provided C.I.A doctors had asked the two to test advancing permanent & or detachable technology

It is either yes fact or the two men know how to emulate a similar style in their acting range which is actually impressive as I can unmanned or partially to fully manned in said neurological sciences & technology research myself

Early days of modern CGI computer generated graphics, sound & a list of other effects for film

Batman Returns

1992 · Action/Noir · 2h 6m

The monstrous Penguin (Danny DeVito), who lives in the sewers beneath Gotham, joins up with wicked shock-headed businessman Max Shreck (Christopher Walken) to topple the Batman (Michael Keaton) once and for all. But when Shreck's timid assistant, Selina Kyle (Michelle Pfeiffer), finds out, and Shreck tries to kill her, she is transformed into the sexy Catwoman. She teams up with the Penguin and Shreck to destroy Batman, but sparks fly unexpectedly when she confronts the caped crusader

For me, Dr Nic Bennett Christopher Walken & Michelle Pfeiffer stand out as do the Bevarian Sect symbolism in the "masquerade party ball" scenes impress me as an active member of such efforts to maintain history in modern times

I like the performances despite a few "hicups" in the packaged final proiction piece

### H.I.3 CASE - LYNN JOHNSTON

Legal action against Lynn Johnston by

Marie Libel Savage Straget Bennett  
Dr Nic Bennett

Lynn Johnston is wanted for operating at & with the one Ontario neurological technology lab cluster locations affecting the four Bennett's capitalizing on the works of Marie & Nic Bennett while using for her own publications between the 1980's-2021 & she did it again between 2022-2024 with interests in the North Bay, Ontario, Canada while operating to negatively affect the four Bennett's in North Bay, Vaughan & the Niagara Region

Lynn is a fraud want to be criminal that created her status & career through ripping off the Savage - Bennett family while operating to sabotage them & others connected while operating at or with those connecting & operating at the one Ontario neurological technology

Lynn Johnston with locals in Vancouver, Winnipeg & North Bay in Canada alongside her own children can describe in court as to her past & current projects including her new children's Robot project & the connection to the one Ontario neurological technology lab between 2012-2024 & prior to 2012 including intellectual copyright infringement internationally & a one off versus accuracy in her now forced legal effort to assist in resolving the H.I.3 case to break even & profit from her new project otherwise she will face legal action as will those connected past-present including potential criminal charges & financial damages

How involved was & is Lynn Johnston in the one Ontario neurological technology lab in efforts taken against Rod, Marie, Jordan & Nic Bennett between the 1980's-2024?

This is a legal matter over rights & safety more than an effort taken by a US \$100 Billion group to suppress or sue artists for damages as "permissions" can be given with expressed interest & mutual respect with legal documents signed between affected parties at little to no cost

Lynn Johnston CM OM (born May 28, 1947) is a Canadian cartoonist and author, best known for her newspaper comic strip For Better or For Worse. She was the first woman and first Canadian to win the National Cartoonist Society's Reuben Award

**Facebook, YouTube to face new rules under  
Canada online law**

The H.I.3 Case hosted publicly on just over 30 Meta: Facebook profiles & 20 Blogger profiles will remain as is despite the adjusted laws within Canada aligning with a list of other countries regulating content on social media or other platforms

[cypressmotors.blogspot.com](http://cypressmotors.blogspot.com)

Dr Nic Bennett

Prime Minister Justin Trudeau's government introduced an online safety law in Canada, joining European countries in trying to compel internet companies to actively regulate and remove harmful content.

The Online Harms Act, introduced in parliament on Monday, will make platforms responsible for reducing exposure to damaging content, including material that bullies or sexually victimizes children, or incites extremism, violence or hatred.

The law will cover companies that offer social media platforms, live-streamed video and user-uploaded adult content, as long as they meet a certain threshold of users, a figure that will be determined in later regulations. Firms such as Google's YouTube and Meta Platforms Inc. are expected to be affected.

It will also create a regulatory body called the Digital Safety Commission to enforce rules, receive complaints and order removal of content. An independent digital safety ombudsperson will also support and advocate for users.

Canada is late in introducing online safety legislation compared with jurisdictions, such as the United Kingdom, European Union and Australia. During the 2021 federal election campaign, Trudeau's Liberal Party promised to introduce a law that would "put a stop to harmful online content and hold platforms accountable."

The bill would also create a new standalone hate crime offense that would apply to every other offense in the Criminal Code, allowing the conduct to be treated as a crime in itself rather than an aggravating factor in sentencing. It would allow for penalties of up to life in prison.

It would also establish a process for people to file complaints about online speech to the Canadian Human Rights Commission, which could order the user to remove the content and compensate victims up to \$20,000 (US\$14,809).

The bill adds to a list of contentious internet regulations introduced by Trudeau's government in recent years. Critics have raised concerns about the balance between protecting internet users and safeguarding rights and freedoms.

Conservative Leader Pierre Poilievre, Trudeau's main rival, called the bill an "attack on freedom of expression" before seeing the legislation.

Last year, the government passed two key laws targeting online platforms. The Online Streaming Act aims to force platforms such as Netflix Inc. and Amazon.com Inc., to fund local media and feature Canadian content. The Online News Act requires Alphabet Inc. to pay for news content.

In response to the latter, Meta has suspended all links to news content on Facebook and Instagram in Canada to avoid making payments. The news block is battering news outlets that relied on Facebook to reach their communities, including small organizations that are sometimes the only providers of local news in rural areas.

## BASIC CAPABILITIES - NEURO-TECH

Frequency - Electromagnetic - Pulse - Acoustic

Permanent or detachable full body drone robot puppet ventriloquist doll technology devices attached to the biological body of human, animal, mammal & insects

Wireless signals attached to the brains physical pineal gland using specific hertz to connect & maintain connection

Electrical signals sent through the body to take control of all muscles & internal organs function from partially to almost fully or not at all

The eyesight & hearing is unlocked allowing for monitoring of

All thought, imagination & memory is unlocked & can be extracted

Consciousness is locked in when the physical is taken over using wireless electrical signals to control the physical

## FURTHER CAPABILITIES

Once the wireless signal connects to the physical brains pineal gland an imprint of the physical body shows up within the full body device & on the screen so you can monitor & wear the subject body like an avatar suit to take partial to full vocal, physical & psychological control

You can monitor all senses & mental state: thought, imagination & memory

At this point locking in the consciousness allows you as a person or with multiple to control muscles, internal organs & ability to speak by disability vocals to send your voice through their mouth & even into their skull & ears to control the body wirelessly

Advancements left automated systems connected with cameras pointed at so people can just log in & control the body using mechanical to digital systems rather than a human team while there is software associated with then heads up display capabilities & software the conscious subject candidate can control themselves for different efforts if allowed to creating ability for them to multi-task psychologically-mentally & physically naturally then between controlling the software separately simultaneously

Some devices have a permanent attachment signal that cannot be turned down in Hz hertz to detach from the body while detachable equipment can attach & detach with a click of a button yet you can reattach the body

Conscious mind synapses sent through the physical body via the brain

Neuro-tech intervention sharing the body or locking in the conscious mind to take control sending wireless signal controlled synapses through the brain to the physical body

Canada is a country in North America. Its ten provinces and three territories extend from the Atlantic Ocean to the Pacific Ocean and northward into the Arctic Ocean,

making it the world's second-largest country by total area, with the world's longest coastline. Its border with the United States is the world's longest international land border. The country is characterized by a wide range of both meteorologic and geological regions. It is a sparsely inhabited country of 40 million people, the vast majority residing south of the 55th parallel in urban areas. Canada's capital is Ottawa and its three largest metropolitan areas are Toronto, Montreal, and Vancouver.

The United States of America (USA or U.S.A.), commonly known as the United States (US or U.S.) or America, is a country primarily located in North America, between Canada and Mexico. It is a liberal democracy and republic of 50 federated states, a federal capital district (Washington, D.C.), and 326 Indian reservations that overlap with state boundaries. Outside the union of states, it asserts sovereignty over five major unincorporated island territories and various uninhabited islands. The country has the world's third-largest land area, largest maritime exclusive economic zone, and the third-largest population (over 334 million).

North Korea–Russia relations (Korean: 로씨야련방-조선민주; Russian: Российско-северокорейские отношения) are the bilateral relations between Russia and North Korea. The Soviet Union (Union of Soviet Socialist Republics, USSR, the predecessor state to the Russian Federation) was the first to recognize North Korea (Democratic People's Republic of Korea, DPRK) on October 12, 1948, shortly after the proclamation, as the sole legitimate authority in all of Korea. The Soviet Union supported North Korea during the Korean War. North Korea was founded as part of the Communist bloc, and received major Soviet military and political support. The comprehensive personality cult around North Korea's ruling family was heavily influenced by Stalinism. China and the Soviet Union competed for influence in North Korea during the Sino-Soviet split in the 1960s, as North Korea tried to maintain good relations with both countries.

You die. You operated at or with between 1985-2024 so you loose your life

POWER IN NUMBERS AGAINST CANADA

We are banding together with multiple countries & areas of each population separate from the Lola Sphere & development of rebranded & Sydney Bennett branded companies & Art by Dr Nic Bennett with between 2-5+ billion people in our efforts to brutally terrorize the Canadians wirelessly including all new births in response & retaliation over the 2012-2024 rape-torture & terror attacks on Dr Nic Bennett after separate efforts taken prior to 2012 dating back before 1999

MEMORIES EXTRACTED 1985-2024

The memories of. Dr Nic Bennett as a conscious person with perspective

I, Dr Nic Bennett am 100% against every experience & memory I had experienced & that of which was extracted from my memory from years 1985-2024 into the neurological technology lab equipment housed in three crated devices temporarily stored in Saskatoon, Saskatchewan, Canada & at the one Ontario neurological technology lab cluster which refused to settle & unman between 1999-2024

The one Ontario neurological technology lab cluster location affecting my body & life daily prior to 1999 leaving me fighting for control of my body vocally, physically & psychologically - mentally invading my privacy 24/7 made me hate every person that had operated at & with the location then everyone that they had mentioned, contacted then those connected while I am 100% against everyone that had operated separately against me in different ways between 1985 (birth) & present time

The people that review the 10 terabytes of extracted & shared memories of my experience with my conscious opinion alongside just over 30 Meta: Facebook 11-25 hours profiles & 20 Blogger profiles then documented & recorded evidence including traced & tracked offline, online, telephone & mobile correspondence within & outside the borders & airspace of Canada have to understand that I, Dr Nic Bennett do not want to communicate with any one person regarding my daily experience ms between 1985-2024 & or anything pertaining to the H.I.3 case unless it is in front of a court house, judge or Justice, jury & unbiased legal representation with unbiased experts analyzing

I, Dr Nic Bennett support the mass scale M.S.P-M.C.G Murder City global counter attacks on everyone involved & connected daily between 1985-2024

## EXCEPTIONS

The exceptions involve education, study focus, social, financial & career portfolio development & interest in developing knowledge, skill, adult sexual habits & a routine, perspective with strict rules, awareness of international laws & a series of demographic categories in a designed natural rabbit hole which became myself like others from ages 0-6, 7-11, 12-17 then ages 18-38 now in present time as I write this pissed off over what I was put through between 2012-2024 after separate efforts prior to 2012 dating back before 1999

These fu\*king culture magg\*ts operating at & with the one Ontario neurological technology lab cluster locations separate from my efforts with then Michael Persinger & Dr Mary Koslov did not want me having a wife, children or career to support & owning a whole lot or doing a whole lot while they expected to cut my life short seizing assets & earnings while

monitoring & or monitoring & controlling me wirelessly pissing me off 24/7  
with whoever while in contact with whoever

## COMMUNICATION

If one or more persons, groups, singles, couples or families wanted to  
communicate with me

Face to face with or without security present

Through approved online virtual camera & email or text conversation

Not you spy on & through my brain, full body & inflict pain causing  
temporary repetitive & permanent injuries while screaming or speaking  
into my skull-ears or through my mouth in different ways wasting my time  
interrupting what I am doing while monitoring my mental state expecting  
to take control of my body & life every waking & sleeping moment 24/7

If a health board or court ordered stated I required this effort allowing me  
to know who I am working with & who they are connecting with I would  
legally accept just like consenting in research within & outside of  
neurological sciences & technology

## BILLIONS OF DOLLARS GONE FOR NOTHING

The one Ontario neurological technology lab cluster locations affecting the CIG SB -

group billions of dollars

The responsible parties & those connected between 1999-2024 should be  
deceased regardless for their opinions, false claims, assumptions against fact &  
disrespect then efforts to sabotage the group in their professional & private lives  
between that time frame daily, weekly, monthly & quarterly using whoever they can  
connect with within & outside the borders & airspace of Canada

Patrick Rothschild-Bennett tolerates USA & Canada. Dr Nic Bennett does not trust the USA & does not tolerate or trust Canada or the majority of Canadians for actions taken against between 2012-2024 after separate efforts taken prior to 2012 dating back before

We understand earths history, past & on-going events daily then different situations in all 195 countries Governments, within the Private Sector in all borders & airspace then international waters & the situation with changing sanctions & the balancing act of all financial concerns at all levels including multiple scenarios between allies, enemies & different areas of conflict

This includes the situation with Ukraine, North - South Korea, Russia & multiple other areas of past, on-going & future potential forecasted events which could create altered Government & Private Sector controlled sanctions for control then efforts in manipulating public & private market trade in all areas of global economic activity then debt & areas of financial interest

The one Ontario neurological technology lab cluster location in question had my body connected to illegally monitor & or monitor & control me prior to age 10 before 1999 & had left me unmanned most of the time yet they had fought me for control often before their death pact involving non-stop detention & execution or a combination of practices carried out between 2012-2024 while I worked with others around these efforts in developing & maintaining my separate life under harsh conditions with no explanation at all at the hands of those operating at & with the one Ontario neurological technology lab cluster locations operating then & 24/7 since

WHY THE CANADIANS ARE EXPERIENCING RETALIATION

An economic adjustment during the intelligence war

Why we are destroying the lives of every Canadian citizen minus just under 500,000

The one Ontario neurological technology lab clusters affecting the CIG SB - RBK Seven

DISRESPECTFUL PEOPLE - ILLEGAL ACTORS

While the CIG SB - RBK Seven are always respectful upscale people while multiple people the group had met between birth - present time (2024) diverse groups of people with the majority being disrespectful

People that use assumptions against fact in superiority then immaturely make a literal ass of themselves with others in an abusive public or private display of disrespect looking down on someone condescendingly

We are exposing PWC & KPMG along with Jordan Bennett in every area of over 100 countries as the most disrespectful, abusive pieces of fu\*king sh\*t illegal actors that are manipulative disturbing people with superiority complexes that are documented & recorded operating with the one Ontario neurological technology lab cluster locations negatively affecting

the CIG SB - RBK Seven between 2012-2024 after separate efforts taken prior to 2012 dating back before 1999

We are exposing everyone Jordan Bennett had met in his life (1983-2024) then that of those his parents Rod & Marie Libel - Savage - Stargrat - Bennett met (1953-2024 / 1955-2024)

My relationship with my brother

We were not close between 1999-2011 & again between 2013-2015. We don't communicate since 2015 as a conscious life choice's separately then the situation with the one Ontario neurological technology lab clusters prior to 1999 & post (after)

Despite my legal effort to discredit false claims made by those operating at & with the one Ontario neurological technology lab cluster location between 2012-2024 & or prior to 2012 dating back before 1999. There is no relationship since 2015 at all & there will be no relationship permanently despite those operating at or with the one Ontario neurological technology lab cluster location in question bringing Jordan Bennett, wife Amy Tom's & three children then family & extended family then those connected past & present within & outside of Canada

All documents pertaining to past-present assets & receipts catalogued

We are 100% against the majority of the Canadian population with just under 500,000. We expect 41 million lives minus just under 500,000 destroyed in every way possible permanently before 2029 in response & retaliation

## UNITED STATES OF AMERICA

We became the enemy of the United States of America between 2012-2024 for operating with & at the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven

Any one American citizen caught operating by at or with the one Ontario neurological technology lab cluster locations loose their lives before 2029 regardless if they operated at or with the responsible neurological technology lab cluster locations at anytime between 1980's-2024

## WE WILL NOT BE RETURNING TO CANADA OR USA

The people & groups that operated at or & with the one Ontario neurological technology lab cluster locations in question between 1980's-2024 destroyed our opinions, image & relationship with people in Canada & USA permanently

Past - present 24 hour rotational teams with volunteers & guests flown in & driven in

Stakeholders

Supervisors

Operating Handlers

Persons & groups connected, contacted & those connecting through different offline, online, mobile & telephone channels of communication within & outside the borders & airspace of Canada

Corrupt areas of the Canadian & US Government operated with different areas of banks in Canada & US alongside multiple collective persons, groups, companies, brands & businesses between 2012-2024 & prior to 2012 dating back before 1999 using different accusations & false claims against fact with assumptions to attempt at justify actions taken against the CIG SB - RBK Seven between the 1980's-2024

These people obtained not only a stolen mobile phone in Banff (2018-2023) & ID with different neurological technology lab operations & crime groups operating at or with these labs & within areas or Government in different parts of Canada & USA but they had also exposed our banking information, social insurance numbers, tax information, personal information, past-present assets while placing restrictions on our lives 24/7 mainly between 2012-2024 using collective opinions so we are returning the favor by counter attacking all of Canada including Government, Private Sector, persons, groups, singles, couples & families

## THE CANADIAN & US - INTERNATIONAL INTERESTS

The people involved that operated at & with the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven between 2012-2024 all die before 2029 regardless

Each individual that spied on & through the sourced full body neurological technology lab equipment illegally connected to the bodies of CIG SB - RBK Seven

You loose your lives with everyone connected if we cannot have you incarcerated permanently in maximum security penitentiaries in solitary confinement

Each individual that had spoken vocally near, into or through the sourced full body neurological technology lab equipment illegally connected to the bodies of CIG SB - RBK Seven

You loose your lives with everyone connected if we cannot have you incarcerated permanently in maximum security penitentiaries in solitary confinement

### THIS IS WHAT THE CANADIANS WANT

You collectively band together as majority power in numbers strategies within & outside the borders & airspace of Canada doing what you did from your non-standardized private interest neurological technology labs you set up with sourced neurological technology equipment hooked up to those you life in for something else then you expose their entire life cycle of thought, imagination & memory then eyesight & hearing while connecting with people they did & did not meet

You then expect as a majority population not to face a wrath in response & retaliation where your image, character, credibility & reputation in your life cycle of ages 0-6, 7-11, 12-17, 18-25+ under a microscope

Act this & you receive back what you do unto others ten fold, 1000 times worse using our big bank finance security rule under first domestic & international law then based on your ability to cross the edge of law, ethics, as to what is humane or inhumane to the illegal realm of wrong from right in basic, mid level & advanced common sense of the educated or not

Disrespect to ones face. Collective interests connected to & Jordan Bennett 50-75% of the time (1999-2015) versus different efforts 1985-1999 as child or teenager

Family, extended family or in-law married in or dating partners friends & family then school - private life social circles

Well Nic the fu\*king bold retard could maybe push a paint brush... always work for failure want to be's that can't quite make it that shouldn't have a whole lot or do a whole lot as they are stupid & they shouldn't be raising children

When I am a poverty ridden loser I should be stated these assuming they are superior & critical misjudgement disrespecting me to my face & behind my back often on record

Is the camera & they fear Nic the retard cannot replace as he is to be bad with finance personally, privately & professionally as we all collectively assumed &

Efforts to test, monitor & or monitor & control Nic face to face, through wireless neurological technology equipment then through people at educational institutions, professional workplaces & in the private life of based on common interests with different people connecting separately or with those operating with & at the one Ontario neurological technology lab cluster locations prior to 1999 & since

People taking Nic for stupid & forgetful expecting a want to be aloof stupid fu\*k that will disregard, shrug it off & or maybe not understand as processing information requires extra time

Is the Losi (RC car) Hardi enough?

Could retarded Nic break it & not have enough money to make the payments to replace it?

A paint brush perhaps?

Could retarded Nic even understand what paint & brush is or how to use in different efforts professionally or creatively?

Very critical judgment, false claims used as a tool in

Efforts to make retarded Nic seem stupid, incapable, insuperior, a poser want to be while they seem like the better people using their greed - solution superiority approach in their separate lives in a very strictly critically judgmental way while they claim they are then envious of the freedoms retarded Nic has as they are not discriminatory to diverse

groups yet in secret it is a very different often abusive is respectful situation with at times borderline sarcasm versus hatred, dislike & disturbing disrespect behind ones back, to their face & amongst others connected they know or do not creating a series of misleading statements people hold the target to which are rarely even 10% accurate

Nic the retard. Blackie the nigar slave. The lists of disrespect by those operating at & with the one Ontario neurological technology lab cluster locations between the 1980's-2024 including those in my Canadian & extended family then those connected past-present

To Rod, Marie, Jordan & extended family with Jordans wife Amy Tom's then her family & extended family the condenses on opinion is that they are & Nic is just some stupid want to be failure loser that has no skill, ability, education & is to be bad with finance while culture ex-wife that renounced her marriage & relationship Jackie Keller expects that she was better to settle with an ugly fat retarded loser want to be of Nic with similar interests yet that was to be good with money in different ways separately while she operated with those at the one Ontario neurological technology lab cluster location in question between 2007-2024 & others separately to seem superior above staking false claim that Rod & Marie allegedly paid Nic's way covering all his wages & expenses as a further effort to discredit Nic's earned education, developed social, financial & career portfolio, then earned income, savings & investments

All efforts to credit themselves & others while collectively discrediting & disrespecting Nic "the retard" as claimed as someone that allegedly fabricated & fabricates his reality, past & life cycle of experiences as per their false claims with assumptions against fact to seem superior amongst different people they had met, those they spend time around & others in their lives past & present operating as the greed vultures they are

"Homeless like conditions & disrespect, intervention by a threat lab & multiple connected or separate threat labs then efforts to display capabilities & different efforts yet a missing Siamese cat & altered plans with family & friends due to a threat level. Joining first line on a temporary contract was not the concern due to expertise & the situation at hand affecting multiple groups within North America & internationally"

Siamese cat Sugar which connected into research through Dr Mary Koslov & friend Miranda was fine in Calgary yet lost weight due to a week stay at a Brampton animal hospital & shelter between flights yet was checked up & almost given a surgery she did not require

We have no status on her whereabouts or if she was euthanized after November 9, 2024 in Palm Springs, California, USA

#### THREAT LABS VERSUS STANDARDIZED

We effectively traced signals to threat labs operating in undisclosed States & Provinces in North America obtaining wireless neurological technology equipment housed by these non-standardized labs operating affecting different minors & adult targets

Standardized labs with court order & health boards can operate with subject candidates or patients for different purpose while threat labs or labs that become threats are being shut down after extensive investigations while subjects are traced from their person to the lab housing they device for investigation

I, Dr Nic Bennett want to integrate a third party connecting application for US & other Governmental departments for tracing & tracking different level on-duty & off-duty uniformed & undercover personnel including drafted so they are not mistaken by others in Government & connected private security operating domestically & with international allies such as the 5Eyes

WE CANNOT GO BACK IN TIME

Arguing what a person would do consciously birth to present time differently from valid memory from a now perspective, a then perspective during a life cycle daily ages 0-6, 7-11, 12-17 & 18-25+ does little

It is important in calculating financial damages in a criminal case where efforts were taken against to find a legal remedy in damages owed over dictation versus conscious choice

Arguing what you or one or more persons would do while reviewing a persons memory extracted for review including sight-vision, hearing, thought, imagination, memory does little

It is important in calculating financial damages in a criminal case where efforts were taken against to find a legal remedy in damages owed over dictation versus conscious choice

The only situation that is important

The present time as time ticks away in the present

Plans for tomorrow & the unforeseen

Expectations & financial - social ability to structure & legally enjoy your conscious choice in a daily life with a work life balance meeting basic needs & earned privilege

## ENEMY OF CANADA

Jordan & Nic Bennett became the enemy of Canada as a country between the 1990's-2024 in response to the one Ontario neurological technology lab cluster locations efforts affecting both brothers between the 1980's-2024

The Bennett brothers are with just under 500,000 people against the majority 40+ million Canadians

Approved screened companies, brands & businesses including imports operating within the borders & airspace of Canada versus those we are 100% against boycotting then the blacklisted persons & persons of interest versus trusted persons & trusted companies, brands & businesses

We are against the Government of Canada 100% including all areas of Federal, Provincial & Territorial Governments at all levels

We are 100% against most areas of Canadian banks & media then the majority of areas of Medical & Dental then insurance separately

Our tolerance in Cnaada is for non-corrupt Police Officers that administer the law only & solely otherwise we do not tolerate the Government & most areas of the Private Sector due to corruption & the responsible neurological technology lab operations while all laws & rights are disregarded for the majority of the population with a public status quo is upheld

People that complain are ostracized & sabotaged in their professional & private lives

Seasonal based anti-viral flu or cold based temporary medications rarely administered 1985-2024

Minimal is the best option

Snakes & Ladders

Maslow Heirarchy of Needs

Medications should be a last resort in minimal form while social - communicative education should be first with diet & exercise in structured routines with goals in life

The idea of chemically imbalanced surrounding a underdeveloped or deformed person from moderate to severe rather than not or mild makes sense yet still there are many options before medication

Mild effect medications

Moderate effect medications

Severe effect medications

Safe for operating vehicles or any moving or powered object or not

Multiple medication professionals used by the one Ontario neurological technology lab cluster location between 1995-2022 in Quebec, Ontario, Alberta, California, Massachusetts & Nevada focusing on psychological-mental, physical then gender & sexuality while taking vocal, physical & psychological - mental control of the body wirelessly by force locking in the consciousness administering different normal, detention & execution or a combination of practices by force revoking the conscious choice & free will then rights of the person on their behalf illegally with no health board or court order to overtake such right wirelessly operating from a non-standardized location with sourced full body neurological technology equipment connected to the body after the subject candidate was lured in for something else, connected then sent on their way only to be informed over a year later & the location of the device withheld from the subject affected daily since

Medical Conditions of Dr Nic Bennett

Neck - Spine injury sustained in 2003 & further made worse between 2011-2012 / 2012-2024

No non-visible or visible psychological - mental or physical disability of any sort

The one Ontario neurological technology lab cluster locations attempted to manufacture & fabricate symptoms of mild autism Aspergers Syndrome

in one test of three in 2004 without allowing the evaluating medical professional team to see documents & wireless neurological technology equipment housed at then two labs voiding the diagnosis then IBS Irritable Bowel Syndrome potential in the form of auto immune diseases Ulcerative Colitis, Diverticulitis or Chrons were a potential yet inconclusive & deemed not part of the accurate dNA make up as symptoms were manufactured by forced dieting & neglect with detention practice using neurological technology lab equipment in creating temporary symptoms

## BASIC FINANCIAL ADVICE

1

Spending money does not sustain as you will not have it once it is depleted or used up

Spend it all within or outside of budget monthly & rack up debt in a loose schedule with no plan or structure

2

A strategic plan & structure in basic form

Saving & investing then only spending a percentage while sustaining a said amount then growing that allows you to maintain your earned or legally gifted wealth

100 dollars. Earnings always replenishes 25% spent to 100 then inflation equation as costs go up & value of 100 dollars goes down then to grow above that

100 - initial 100

110 - inflation 10%

125 - 15 points in growth

25 - spent monthly

In time your 25 grows & you can increase your quality of life monthly & sustain your money to have access to then emergency fund for times when you have to go just above the 25 before getting back into a routine in contraction or expansion based on income & opportunities based on social economic factors to sustain a work life balance financially

## Stakeholder Problems - H.I.3

People operating at & with the one Ontario neurological technology lab cluster locations in question prior to 1999 & post (after) living within & outside the borders & airspace of Canada

These people that paid in to own a percentage of the device connected to the body to monitor & or monitor & control the body wirelessly as a slave prisoner leaving the subject candidate

Stakeholders opting in as supervisors & operating handlers with others operating on past-present 24 hour rotational teams with volunteers & guests flown in & driven in operating with others connected, contacted & those connected internationally leaving under 90 million connected to under 1.5 billion connected internationally now in 2024 since between the 1980's-2024

Stakeholders making daily requests & demands for wireless control & Governance over subject bodies they purchased shares in & their interest in signing in then connecting while monitoring 24/7 all vocal, physical & psychological - mental bodily functions from unmanned to locked in consciousness & partial to full control with normal, detention & execution or a combination of practices including monitoring of thought, imagination & memory then internal organs functions using vast advanced capabilities

#### ONE ABSURD CRIMINALLY ILLEGAL REQUEST

We collectively do not want the Bennett brothers having any money, assets, privacy or control over their bodies & we want them to just have minimal basic needs, no access to health or dental care in a simple controlled borderline homeless life starving in pain

This has been an ongoing request between 2012-2024 after separate efforts taken prior to dating back before 1999

MASS SCALE RETALIATION

We are removing 1.5 Billion people from earth then multiple interests connected before 2029 while 5-6.2 of over 8.1 human beings will exist on earth

THREE LAYERS OF RETALIATION

1.

The people that are physically entered

Ages 0-17, 18-100+ & those since turned age 18+

Criminal charges for their involvement with 30-100+ years incarceration in solitary confinement in a maximum security facility or we execute before or after knocking into neurological technology networks

2.

The people & groups connected to the people that physically entered

Ages 0-17, 18-100+ & those since turned age 18+

Criminal charges for their involvement with 30-100+ years incarceration in solitary confinement in a maximum security facility or we execute before or after knocking into neurological technology networks

3.

The people vocally mentioned & groups connected to the people that physically entered

Ages 0-17, 18-100+ & those since turned age 18+

Criminal charges for their involvement with 30-100+ years incarceration in solitary confinement in a maximum security facility or we execute before or after knocking into neurological technology networks

#### INTERNATIONAL LAWS ASSOCIATED

Unfortunately regardless of domestic laws within one or more countries borders & airspace or international laws including international waters we are executing every human being involved & connected which operated at or with the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven between 1985-2024

The people responsible that operated at or with the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven included efforts to leak information amongst themselves & different persons, groups, singles, couples, families, companies, brands & businesses then banks, areas of Government, media & other in the Private Sector including Medical & Dental

Everyone involved & connected then those operating separately are getting killed regardless for their efforts taken against Nicholas James Joseph Bennett - Sydney Nicola Bennett

The rape-torture & terror efforts taken against between 2012-2024 & prior efforts taken between 1985-2011 cost everyone involved & connected their lives

People operating directly from the one Ontario neurological technology lab cluster locations in question & those operating in connection to with connected groups which will all be losing their lives

## INTERNATIONAL PROFILING

Responsible Threats

Levels 0, 1, 2, 3, 4 & fluctuations

Separate Threats

Levels 0, 1, 2, 3, 4 & fluctuations

Blacklisted - Boycotted - Persons of Interest

Trusted Persons

## PRIVATE DRAFTS - INVESTIGATIONS

Retaliation Efforts

Investigators - Counter Attackers

Groups of paid & drafted persons have to investigate as part of their daily tasks while maintaining a separate main life operating covertly based on advanced training described in the H.I.3 case while counter attackers carry out counter ops administering laws exhausting all options before using different tactile efforts to sabotage, dismantle, subdue, hold down & execute persons of interest based on fluctuations in threat level

People knocked into neurological technology networks or executed while replacement look-a-like interests are often administered to take control of accounts & assets then overall life decisions with advanced life cycle reviews

If drafted persons & groups refuse to carry out orders multiple drafted groups will declare them persons of interest as traitors operating as public or private double or triple+ agents & they are investigated then silenced using different efforts & groups zoning in on through offline, online, mobile & telephone channels of communication within & outside the borders & airspace the country operating within

1.5 billion lives end before 2029 in response to those operating groups working in the head of Nicholas James Joseph Bennett - Sydney Nicola Bennett wirelessly operating through different offline, online, mobile & telephone channels of communication within & outside the borders & airspace of Canada

Past - present 24 hour rotational teams with volunteers & guests flown in & driven in

MEMORY BASED MASS EXECUTIONS

Every person that met Dr Nic Bennett between 1985-2024 loose their lives before 2029 as do those that operated with & at the one Ontario neurological technology lab cluster location in question affecting Dr Nic Bennett prior to 1999 & post (after)

You don't spy on me or attempt to control me wirelessly with whoever 24/7 & go through my memories without legal consent unless you want to fu\*king die while being made a global example of

Every human being involved that operated physically at or with the one Ontario neurological technology lab cluster locations in question between the 1980's-2024 are positively getting killed

If any one person involved or connected expects me, Dr Nic Bennett to agree with one or more persons of over 40 million within the borders & airspace of Canada including those connected to people that are since deceased you can be sure that fu\*k you

I refuse.

If you spoke on my behalf once using assumptions your getting killed or spending over a decade in solitary confinement under wireless control

You want me to accept false claims about me & submit to your lies for the benefit of one or more persons

You can go into the grave. You can commit suicide in front of the global population while your made a global example of in every area of over 100 of 195 countries

If a person in a body that is not me is something I am not. I am not them. They are not me

Comparing me to their separate body & life cycle of experiences then expecting I will accept false claims about me because of their separate life does nothing & I think you should commit suicide

**MAKING SURE ALL PARTIES INVOLVED DIE**

All persons involved past & present regardless of age or any factor

I, Dr Nic Bennett am making sure every human being that physically entered the one Ontario neurological technology lab cluster location in question affecting me prior to 1999 dies before 2026 & or before 2029 regardless of arguments for invading my privacy & revoking my rights then expecting to take control of my body at anytime between 1985-2024

I also expect those connected past - present to experience deceased between that time frame for refusing to appear in court against me regardless of who they are & who they had connected with in their lives

We are using multiple international paid & drafted M.S.P-M.C.G groups to execute all targets that operated at & with the one Ontario neurological technology lab cluster locations affecting myself, Dr Nic Bennett

You physically entered the one Ontario neurological technology lab cluster location or you operated with & on that day you refused to appear in court against me so those that do not investigate your daily life 24/7 then execute your & everyone connected past & present die with everyone else at the hands of other drafted groups monitoring in layers groups of drafted persons in collective international swarms

You appear in court or your knocked into neurological technology networks & killed or just killed as a slave prisoner that refused to plead guilty against documented & recorded evidence & traced correspondence

M.S.P-M.C.G personnel live main lives positioned in place internationally & are highly trained first lines

We administer advanced drafts & are very firm on law, execution orders if those involved do not play ball in investigation requirements, monitoring & efforts to take down different groups negatively affecting our investments & persons within & connected to our group

Dr Nic Bennett CIG SB - RBK Seven

CANADIAN PARLIAMENT CAN DESCRIBE

Why did the one Ontario neurological technology lab cluster locations in question lure us in & have our bodies connected to permanent full body neurological technology equipment to monitor & or monitor & control us

No court order. No health board. No nothing. No explanation

Could a, ah, the Christina Alexandra Freeland with a list of others weigh in between such busy, demanding career schedules in a country foreign to that same country in which I was born & am currently in as the two don't seem to be one place for most

Logical reality

How some see it

Where is the law?

Do rights & privacy exist?

Chrystia Freeland

Minister of Finance of Canada

Christina Alexandra Freeland PC MP (born August 2, 1968) is a Canadian politician serving as the tenth and current deputy prime minister of Canada since 2019 and the minister of finance since 2020. A member of the Liberal Party, Freeland represents the Toronto riding of University—Rosedale in the House of Commons. She was first appointed to Cabinet following the 2015 federal election.

Christine. One of Justin Trudeau's shuffle ladies. Some form of voice if she's not a handled robot for a secret private shadow Government versus those not compromised

No Federal, Provincial or international offences here in available fact

The jurisdiction the Parliament with ignored ethics & unethical inhumane mistreatment while we are ignored with documented & recorded evidence available & traced offline, online, mobile & telephone correspondence

If you operated physically at or with the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven between 2012-2024 & or prior to 2012 dating back before 1999

I, Dr Nic Bennett hate you

I, Dr Nic Bennett hate you any one person you had met or mentioned & anything you think, thought, imagine, imagined, remembered or remember

I, Dr Nic Bennett hate you reject everything you are & anything or any one person or experience, topic & or anything you experience yourself alone or with others & or anything pertaining to me

Speak on my behalf & I reject you as I fu\*king hate you passionately

I, Dr Nic Bennett do not want people trying to work my head or work on my head (change - control me wirelessly)

I don't want to communicate with you or put you with you breathing through my head & taking vocal, physical & psychological control of my body at any moment 24/7 rudely interrupting me regardless of where I am & what I am doing

I do not & did not want to put up with the responsible neurological technology lab cluster locations illegally monitoring & or monitoring controlling my body at anytime between 1985-2024

I did not include you through a wireless neurological technology lab device or face to face & or through other people

If I included you face to face & you were caught operating with or at the responsible neurological technology labs responsible over the 2012-2024 or prior efforts taken before 2012 dating back before 1999

Dr Nic Bennett CIG SB - RBK Seven

MILLIONS OF REASONS - BECAUSE FU\*K YOU

Why I am anti-Canadian

The one Ontario neurological technology lab cluster locations affecting my body & life between 2012-2024 & prior to 2012 dating back before 1999 are exposed & we have been destroying them in every area of over 100 countries for operating with those operating at the one Ontario neurological technology lab cluster locations working against us 24/7

I, Dr Nic Bennett with multiple internationally connecting M.S.P-M.C.G “Murder City” groups are exposing everyone involved & connected daily regardless in response & retaliation legally & privately

This includes those that worked at Hyperactive Watersports in Calgary between 2012-2024 & those connected then separately customers & others connected to them in Western Canada

I hate prices of fu\*king retarded maggots like Brett Ireland in Canada

I literally hate the majority of the Canadian population & disagree with the Government

I am 100% against everyone that had physically entered & operated at & with the one Ontario neurological technology lab cluster locations affecting the CIG SB - RBK Seven

I refuse to talk to any one person that I had met in Canada or those connected

I hate Canadians. I disagree with the Government in Canada. I hate the people within the borders & airspace

I have been collectively globally fu\*king every Canadian maggot fu\*k that crossed me between 1985-2024 on a 24/7 basis between 2016-2024 publicly in over 100 countries

Brett Ireland - A fu\*king good fu\*k

<https://www.linkedin.com/in/brett-ireland-5a8447a5?trk=contact-info>

Not only have we been monitoring these fu\*ki maggots with under 500,000 people of over now 40 million between 2016-2024 & prior to 2016 privately

We have been destroying their image, character, credibility & reputation daily while exposing their past & present addresses, Government ID & social insurance numbers in every area of over 100 countries with updates while they are monitored targets daily

You collectively operating & invaded our privacy then shared leaked information & our identities globally so we are positively fu\*king every Canadian that operated directly & collectively through others daily between 2012-2024 or prior to 2012 dating back before 1999 daily regardless

Every human being within & outside of Canada then company, brand & business involved & connected exposed

Brett Ireland goes into the grave with entire family & everyone connected before 2028 in retaliation regardless just like everyone else

Just under 500,000 Canadians will be alive past 2028 while the rest are knocked into neurological technology networks like some of the 500,000 & or killed if we cannot permanently incarcerate using documented & recorded evidence

Every human being I had met & those connected past & present are to be put through 1000 times worse mistreatment than the one Ontario neurological technology lab cluster locations did to me between 2012-2024 & prior to 2012 dating back before 1999 then they are to experience early deaths as that is what is happening to the Canadian population in response & retaliation due to denied right to trial before 1999 & daily since then the efforts taken against between 2012-2024

Those within the 500,000 live... most of while everyone will be deceased including new births

There will be no forgiveness in efforts taken between 1985-2024 in efforts taken against me by those operating at & with the one Ontario neurological technology lab cluster locations responsible & those operating separately

We will be operating with specific international groups including a set of separate Chinese interests connected to Shanghai to take out all Canadians & international interests responsible in the efforts taken between 1995-2024 using advanced technologies & practices

China (Chinese: 中国; pinyin: Zhōngguó), officially the People's Republic of China (PRC), is a country in East Asia. With a population exceeding 1.4 billion, it is the world's second-most-populous country. China spans the equivalent of five time zones and borders fourteen countries by land. With an area of nearly 9.6 million square kilometers (3,700,000 sq mi), it is the third-largest country by total land area. The country is divided into 22 provinces, five autonomous regions, four municipalities, and two semi-autonomous special administrative regions. Beijing is the national capital, while Shanghai is the most populous city and largest financial center

## TAKING DOWN THE THREAT LABS LIES

The people that had operated at or with the one Ontario neurological technology lab can go back in time & work at Hyperactive Watersports without my body as a robot & instead of connecting with others working there they can just talk to them face to face rather than using offline, online, mobile & telephone channels to communicate then make threats on my behalf without using my body as a wireless robot using me as a human to hide behind & hold accountable as a fall person scape goat

This way I, Dr Nic Bennett do not have to fight for control of my body & work under such conditions with those physically around me micromanaging & overseeing wasting my time & efforts better spent elsewhere

Better sh\*t to do... fu\*k me

Oh baby you want it... oh baby one in a million is you

Oh yeah

I am of good character, image, credibility & reputation with no criminal record & my law abiding honest relaxed balanced life includes earned basic needs & earned privilege managed appropriately so I never risk my career, credentials or private life by allowing some Sam artist illegal actor, criminal, fraudster or cheat to operate using my name as a scape goat at any level small or large

Understand

That includes corrupt areas of Government & Private Sector or persons, groups, singles, couples or families that do had & did not meet operating right in plain sight taking that risk without my name or me involved & never in public or near me

Ever

People & groups get on to what they should be crossing not State lines or Provincial but borders of law & over the edge & wasting Government tax based resources on leads for Police & others when that time could be better spent elsewhere

What a group of fu\*k maggot

Essentially

## JAPAN FIRE DRAGONS WERE REAL

Dragons, mermaids, witches, vampires & multiple interests in mythology & folklore with ancient societies during evolution existed with different since suppressed technologies including space level in advanced civilizations that had been destroyed

<https://www.bbc.com/news/science-environment-68374520.amp>

AMERICAN ULTRA ROBOT

Topher Grace is a fu\*king retard okay. Like. My brain, internal organs & skeleton has been terrorized to the point of no return with permanent injuries since 2012 after prior efforts taken dating back before 1999

This is real. Topher is just an actor. Los Angeles & Coachella Valley is real. Thus Topher is a fu\*king retard. Nothing else to say

I, Dr Nic Bennett am an American Ultra robot fighting to remain alive in Canada retired from my work in neurological sciences & technology while doubling in international intelligence

My body is connected to four permanent & detachable devices

This modern film is the best way of describing the situation. I am fighting with one lab over a second with both connected to different labs & international interests after having been negatively affected & attacked between 2012-2024

The character Mike Howel shares similarities to me based on what I was involved in. My girlfriend Tatiana Bigarda has been looking after my friend Nicole Sydney Bennett which was compromised by an Ottawa threat lab while Dr Tekari Yoshimoto has been looking after Dr Carly Koslov which was compromised by a Los Angeles threat lab

DESPITE MY MAIN CAREER & FOCUS

My efforts doubling in intelligence & research are over... as I was compromised & continued operating prior to 2022 after refusing under harsh conditions since 2016 public disclosures

I was in neurological sciences & technology in research & Government ops with two labs connected to 5Eyes while a third operated against me prior to 1999 & post

I am injured, in pain & requiring a resolution. Pissed off is an understatement

The movies Salt & Changeling with Angelina Jolie are reminiscent of this on-going situation between 2012-2024 despite compounded separate efforts taken against between that time frame leaving leaving me working around

I can unmanned do as partially to fully manned as covered in the H.I.3 case yet I am having a hard time retiring still now after a long-fight to between 2022-2024 after separate efforts prior dating back before 2012

I am not & was not a traitor, infidel guilty of high treason or perjury. I am not a double or triple+ agent defector for a foreign Government or private group

To speak in stereotypes, plurals or like characters & a child like to torment

Some stupid fu\*k screamed let me go into my skull & ears over them themselves or one or more person

I just happen to want to press charges against all parties involved or knock all them the fu\*k out

If you can understand

GRACELAND STRIKES AGAIN

ST LAWRENCE HALL -----

Designed in the Renaissance Revival style by architect William Thomas, the elegant three-storey structure seems almost out of place on busy King Street East (which only adds to its charm)

On the day of its opening in 1851, George Thompson made a speech on the evils of slavery. Several important Abolition meetings were even hosted here when Canada welcomed Underground Railroad refugees from south of the border

Modern underground global wireless slavery railroads operate different yet are relevant
